

Telega EDI and Microsoft Dynamics[™] NAV

Electronic Data Interchange (EDI) refers to computer to computer exchange of business documents in electronic format, for example, sales orders and invoices as e-documents.

Benefits of EDI orders and invoices

- **TIME** – increased speed of processing orders and invoices
- **ACCURACY** – less costly errors as human mistakes are eliminated
- **SECURITY** – documents are delivered over secure channels to authorized recipients
- **COST EFFICIENCY** – no double-entry of data, much smaller processing costs
- **FASTER SUPPLY CYCLE** – products get to stores faster, invoices get paid faster

What is Telega EDI Module?

Telega EDI Module in MS Dynamics NAV 2015 software enables to exchange e-documents with all companies in Telega EDI network.

The list of partners in Telega EDI network can be found at <http://www.telega.eu/clients>
