

**StrongPoint**

**winshop software and**

**Telema EDI**

## What is EDI?

- Electronic Data Interchange (EDI) refers to computer to computer exchange of business documents in electronic format, for example, sales orders and invoices as e-documents.
- E-invoices are faster and cheaper than paper invoices. It is estimated that over 50 EUR can be saved in one transaction when replacing paper documents with e-documents.

## What is Telema Module?

Telema Module creates a technical possibility to exchange EDI orders and EDI invoices with all companies in Telema EDI network. The list of partners can be found at <http://www.telema.eu/clients>.

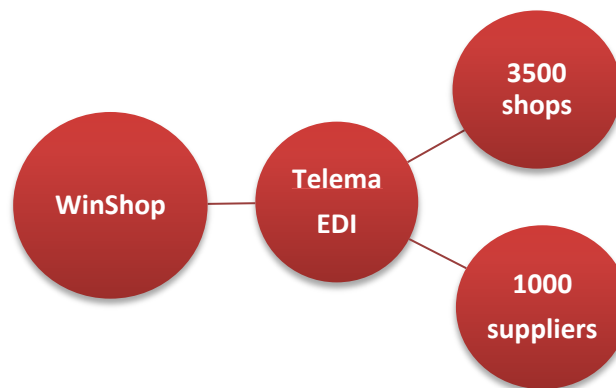

## How to start with EDI?

In case your company uses WinShop software, then to start using EDI you need 3 simple steps:

1. First, please contact StrongPoint specialists at +372 650 4200 and Telema Module will be set up in **3 working days** latest.
2. Second, you need to join Telema EDI network. For that, please write to Telema sales representative at [telema@telema.com](mailto:telema@telema.com) or call +372 651 0650. After signing the contract, we need to create an account in Telema system and link you with your trade partners. This can be done in **1 business day**.
3. Third, you need to modify your agreements with your trade partners to specify EDI as channel for communication and exchange of EDI orders and EDI invoices.

## Benefits of EDI orders and EDI invoices

- **TIME** – increased speed of processing orders and invoices
- **ACCURACY** – less costly errors as human mistakes are eliminated
- **SECURITY** – documents are delivered over secure channels to authorized recipients
- **COST EFFICIENCY** – no double-entry of data, much smaller processing costs
- **FASTER SUPPLY CYCLE** – products get to stores faster, invoices get paid faster
