

## EURO AQUA: Integrated local water governance in EaP

<http://www.ctc.ee/running/euroaqua>

EaP countries face many challenges when adjusting and adopting the EU environmental acquis, the Water Framework Directive in particular.

### Objectives

- To strengthen competencies, practical skills and engagement of local stakeholders involved in water management
- To enhance cooperation between state institutions, local authorities and CSOs in addressing local issues by creating know-how and experience sharing opportunities
- To share EU/EaP know-how and best practices enabling local stakeholders to effectively and tangibly address water sector directives implementation
- To promote water management issues at CSOs local forums in each EaP country

**200 people  
reachout**

**7 countries  
participated  
in a project**

### Partners

**Estonia: Peipsi Center for Transboundary Cooperation**

**Azerbaijan: Ornithological Society**

**Georgia: Foundation Caucasus Environment**

**Moldova: EcoContact**

**Ukraine: Environment-People-Law**

**Belarus: Ecohome**

**Poland: Development Policy Foundation**

### Outcome:

around 25 people from EU and Eastern partnership countries gather to Stefan Vodă region in Moldova to discuss good practices on Water Framework Directive (WFD) and challenges in engagement of local stakeholders.

As one of the outcomes of the project, the brochure on barriers and good practices in local water management will be published in November 2018.
