NOW!
INNOVATIONS

www.nowinnovations.com

NOW! OS is hardware neutral, modular and easy to integrate. Any parking, EV charging, and mobility management hardware and software can be integrated through API.

NOW! OS is an operating system to manage all mobility services for municipalities, parking operators and other mobility service providers. NOW! OS allows to increase service quality, improve financial results, cut costs and make drivers happy customers.

Cloud-based

Thanks to the SaaS and pay-as-you-grow models, NOW! OS requires only reasonable investment and business can be scaled according to changing needs. New features are delivered on a regular basis, keeping you ahead of the game.

NOW! OS platform offers

- Asset management
- Price engine
- Payment and billing
- Initial set-up
- Customisation
- Cloud-based hosting
- Software support
- Maintenance
