

HACKERS

Registration open
till the end of May!

WEAVE HACKERS

WEAVE

Weaving workshop

WEAVE HACKERS

August 22-25, 2017

Tartu Art College (Estonia)

We will be test driving new loom-related inventions of textile artist and inventor Kadi Pajupuu. Let us twist the warps and bend the weft!

During this workshop weaving teachers and textile professionals can get hands on experience with the loom-related inventions of Estonian textile artist and inventor Kadi Pajupuu. The tools to be used include also Stepping Reed and RailReed. Introduction to MultiWeave – 3D printing with yarn.

We will be using 12 handlooms, among them 2 Toika computer looms. Looms are ready to weave; warp materials include wool, cotton, linen and paper. Participants are encouraged to share their experience in teaching the art of handweaving and show creative works that they and their students have made.

Price: EUR 300 (price includes workshop participation fee, materials used, coffee breaks, excursions and fees for museum visits). Price does not include accommodation and lunch.

WEAVE HACKERS

Timetable:

August 22

- 11-13 Arrival, coffee and introduction of participants
- 13-14 Lunch
- 14-17 Introduction of looms, tools and available materials, weaving
