RESTful Java Developer needed

Your code will help to prevent skin-cancer deaths!

Requirements:
- Experience as Java developer at least 0b10 years
- Database modelling and SQL scripting skills
- Unix-based OS experience at least 0b01 years
- Estonian and English language proficiency

Additional features that make us smile:
- University diploma is a big plus
- You get grumpy, when the quality engineer walks in with a big smile
- You have read security policies and found them useful
- Agile manifesto principles are like blood in your veins
- Worked in a startup and liked the action, hackathons and junk/healthy food
- More RESTful than restless!

Your job includes:
- Coding the greatest JAVA8 RESTful API
- Securing the API against threats and vulnerabilities
- Assuring software quality
- Working in a digital health start-up environment

To apply, send your CV or LinkedIN profile to **job@dermtest.com**.
Want to stand out? Write 2 sentences about your motivation to work with us.

dermtest

Dermtest is a growing digital health company helping to diagnose skin-cancer early.
We just graduated from Startup Bootcamp Digital Health Berlin, was selected among top 20
Estonian startups and raised a seed-round few months ago. Lots is happening in healthcare
from telemedicine to AI. Come and join us on our mission to improve healthcare.
