

# PRACTICAL WORKSHOP: **CAVE HOUSE**

HOBUKOOLI PARK, MAY, 25 – 27, 2018

On this weekend we build a house into the dug hole under ground. There we construct the walls from bags filled with sand. And on the roof we place green roof from soil and plants.

Keywords: sandbliivaags, barb wire, tamper, Mandala roof construction, green roof.

Accommodation: clay houses with 4- and 5-beds. Price per night is **10€** (with own sleeping equipment) and **20€** (with local sleeping gear).

Food: **44€** - vegetarian meals from Friday to Sunday, coffee brakes also included. Inform us ahead please about special needs.

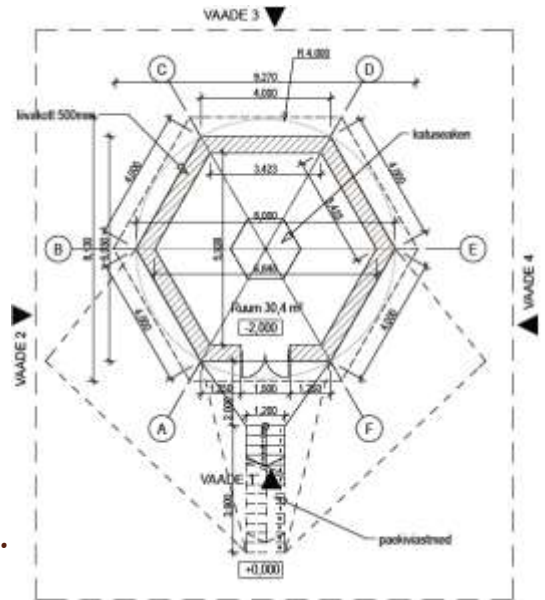

Energy exchange: **111 € + VAT**, to participate in whole workshop. Registration fee 50€ is to be paid before 26.03.

Trainer - **Sven Aluste** (natural builder, trainer)

Info & Registration – gsm +372 56 203 777 [hobukoolipark@gmail.com](mailto:hobukoolipark@gmail.com)

Project is partly financed by local Leader group JAP.

\*Building with **earthbags** (sometimes called sandbags) is both old and new. Sandbags have long been used, particularly by the military, for creating strong, protective barriers, or for flood control. The same reasons that make them useful for these applications carry over to creating housing.
