

Cleveron 301

> Cleveron 301 is a cloud-based parcel locker

> **Fastest step towards automation** – the quickest way to start automating parcel pickup

> **Easy-to-use technology** – quick and easy installation process and training

> **PIN pad or QR code version** – the locker can be operated via app, by scanning the QR code or manually, by inserting a code

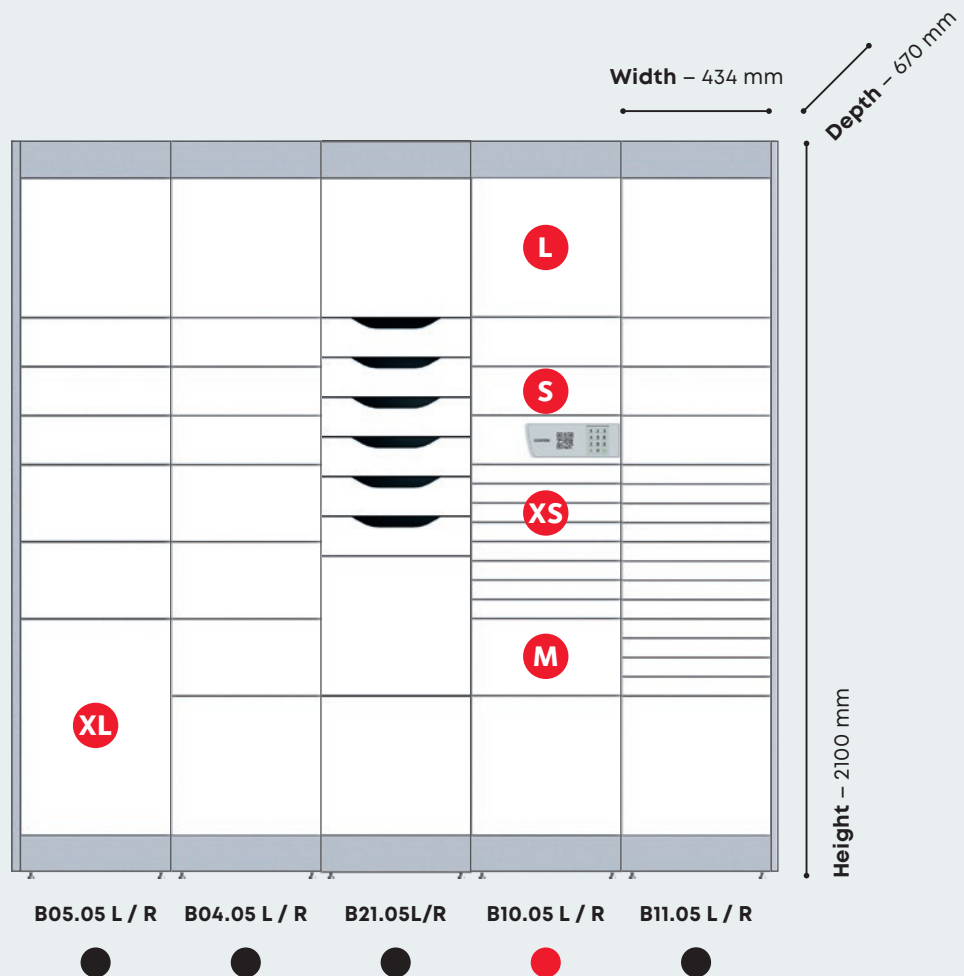

> **Smart mailbox functionality** – an excellent solution for apartment and office buildings

> **Multiple ways to monetize** – click and collect storage, drop-off point, smart mailbox, etc.

> **Cost & space efficient** – has low maintenance costs and stores up to 55 parcels per m²

How does it work?

1. The operator opens the locker doors with the app and inserts the parcels
2. The end-user is notified and receives the pickup code via the app
3. The end-user scans the QR code or inserts the pickup code manually
4. The locker door opens and the end-user collects the parcel

Slots

| Size | Inner dimensions (mm) | | | Max load (kg) |
|---|-----------------------|-----|-----|---------------|
| | H | W | D | |
| XS | 45 | 360 | 530 | 5 |
| *The opening depth of the XS slot is 450 mm | | | | |
| S | 120 | 360 | 620 | 31.5 |
| M | 200 | 360 | 620 | 31.5 |
| L | 380 | 360 | 620 | 31.5 |
| XL | 600 | 360 | 620 | 31.5 |

> Cleveron 301 has a modular design that allows to choose the best drawer/door configuration and layout
