NO NEEDLE FOR SOFT INJECTION

Needle-Free & Easy-quick injection system
Your Best Solution, Comfort-in

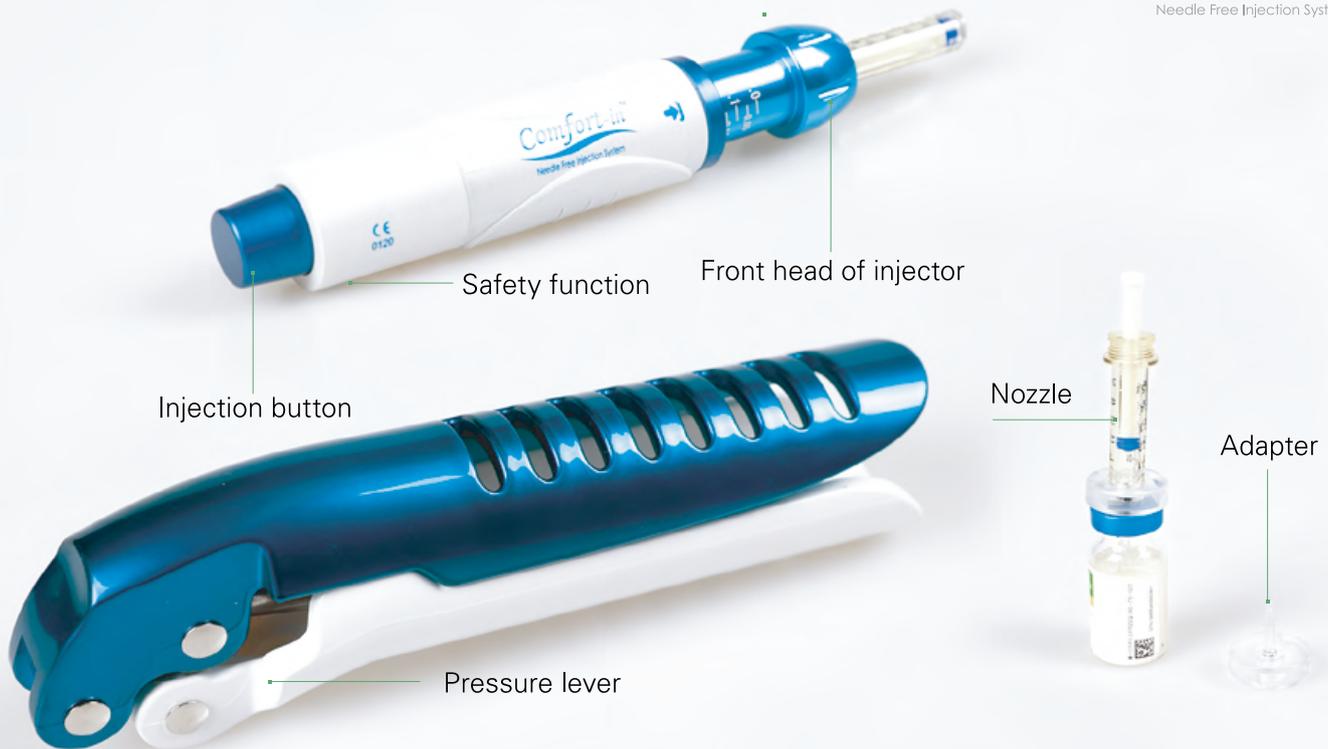

Comfort-in™
Needle Free Injection System

Comfort-in **Needle-free Soft Injection System** delivers any liquid medications into your skin and into the subcutaneous tissue without any sharp needles penetrating your skin! Comfort-In delivers liquid medications by using its high pressure power and velocity to create a fluid-jet and lets the medication penetrates into skin through a specially designed micro-sized orifice at the end of Nozzles.

Product Composition

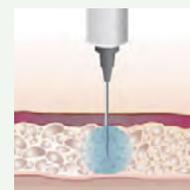

Comfort-in™
Needle Free Injection System

Strong points

- No needle phobia
- Safety from needle injury
- Less dependent on doctor/nurse technique than needle syringe
- Short injection time
- No 'Sharp needle' waste

MIKA MEDICAL CO

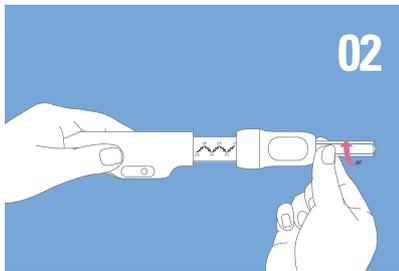

Production for medical care since 1990

Application

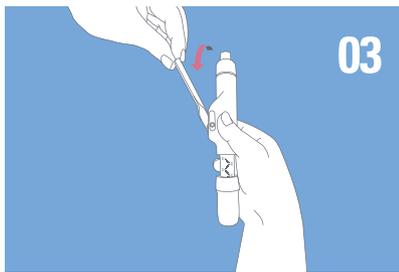

01

Preparing nozzle : Extract medication to the sterilized nozzle with an adapter. Make sure there are no bubbles left at the top of nozzle.

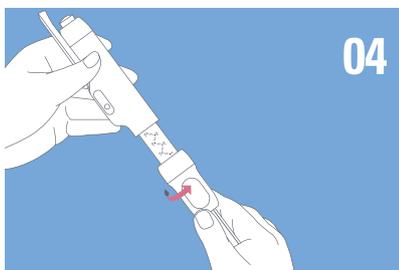

02

Insert the pre-filled nozzle tightly into the injector.

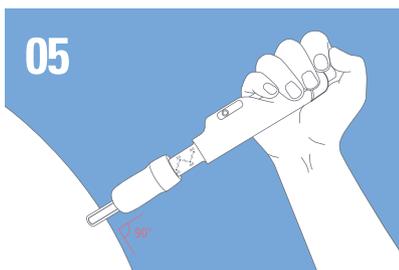

03

Pull the device handle till clicking sound.

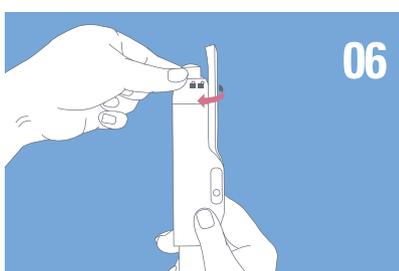

04

Adjust the scale you want to inject at a time between 0.01cc and 0.13cc

05

Clean the injection site by alcohol swab and keep place the injector at 90 degrees angle. Push the button when ready!

06

Repeat the operation by pulling the pressure lever and adjust its scale. Lock the device by rotating the button to the right side when storage.
