

DARKROOM

Come and “see” with your hands!

1. Enter the darkroom one at a time.

ATTENTION: Do not use your mobile phone light in the darkroom!

2. On the left side of the darkroom there is a table with 2 tactile book pages on it.

3. “Read” the pages of the tactile book by touching it with your fingers. Try to perceive what is depicted on each page, what story is it telling?

4. When you leave the chamber, you can check what you just watched on the wall on the left.

5. By opening QR codes, visually impaired people can listen to descriptive translations of book pages viewed in the darkroom.

Good luck and a sensitive mind!
