

Don't ruin the fruits of your labour  
with a bad tank

## » Distilling mash tank FD-B

Speidel's distilling mash tank FD-B is a must for distilleries because top-quality mash belongs into a top-quality tank.

The tank's plastic base for transportation and storage guarantees the tank's easy and safe handling. Due to the base the tank is, of course, accessible from underneath by forklift/pallet truck.

### APPLICATION RANGE

- |                  |           |           |
|------------------|-----------|-----------|
| › Storage        | Ideal for |           |
| › Transportation | › Mash    | › Must    |
| › Maturation     | › Wine    | › Spirits |
