TECHNICAL INFORMATION 72

Balteco, as a leader in hydromassage bath development and manufacturing in Northern Europe, was established by a group of talented and ambitious engineers in 1990. Over the past two decades we have gained a lot of experience and extremely valuable know-how, which has shaped Balteco original bath catalogue to represent probably the best hydromassage bath ranges and soaking bath ranges on the market. Balteco bath catalogue include a long line produced from sanitary cast acrylics and Solid Surface baths branded as Xonyx™ massive stone baths.

As a recognised leader of hydromassage bath development, we have over the years introduced numerous valuable functional innovations and technical solutions that after Balteco introduction have become an industry standard and adopted by other quality manufacturers. As proof of continuous innovative product development and award-winning product design – Balteco is proud to claim vastly more than 100.000 satisfied hydromassage bath customers all over Europe.

Our aspiration and everyday challenge is to design for our customers the absolute best hydromassage baths and soaking baths with original design, premium quality and innovative functional features.

MASSIVE STONE PRODUCTS

UNIQUE RANGE OF XONYX™ MASSIVE STONE BATHS

Xonyx massive stone is a unique composite formula created by a leading European solid surface bath manufacturer Balteco. Xonyx massive stone is a homogeneous mixture of selected mineral fillers and polyester resin with acrylic compounds. Xonyx massive stone baths offer in addition to exclusive designs, innovative construction, superior structural durability and scratch resistant hard surface.

DUAL WALL DESIGN FOR COMFORT AND ENERGY SAVING

Xonyx design team has developed the unique dual wall architecture offering numerous advantages over regular single wall stone baths. The dual wall allows for a comfortable contoured internal surface whilst maintaining stylish external bath shapes offering a more relaxing and ergonomic bathing experience. Dual wall also reduces heat loss keeping Your bath water warm for longer and conserving energy.

WARM AND SILKY SURFACE

Xonyx massive stone bath surface is machined into a silky smooth surface quality which is pleasing to touch and easy to clean.

EASY TO INSTALL

To provide even, sturdy support for these baths and to ensure the weight is well distributed over floor area, a robust bottom support frame with height adjustable legs is integrated into the base of each Xonyx bath. Bath outer layer height is designed to hide the bottom support frame from the view and allow for the drain and on-floor siphon installation without a need for bathroom floor reconstruction.

BUILT-IN OVERFLOW

Xonyx baths all come with a discrete built-in overflow. A neat machined slot allows overflow water to drain through a sealed tube hidden in between dual walls. This hygienic solution also means there are no external overflow pipes or other visible fittings that would spoil the sleek Xonyx look.

WHITE XONYX WASTE

Xonyx baths are all fitted with a beautiful white Xonyx waste plug with durable and serviceable internal pop up mechanism. The absence of any visible chrome or metal fittings means Xonyx baths may be easily combined with tap mixers of any color or finishing.

ATTRACTIVE COLORED PANEL

As standard, Xonyx baths are offered in white finish. On request, outer panel can be painted and matt laquered into any color according to RAL color system.

DELIVERING THE PERFECT BATH

Xonyx baths are delivered in a protective plywood crate on a strong timber pallet in order to guarantee all world-wide shipments in pristine condition.

ACRYLIC BATHS

MARKET LEADER IN HYDROMASSAGE INNOVATION

Balteco, as an experienced design and engineering company, sets trends in hydromassage bath design and innovation among the European manufacturers. All Balteco bath ranges are designed to offer eye-catching aesthetics, highly valuable functionality and unparalleled user comfort. More than 25 years of experience in design and development allows us to create and implement functionality features corresponding to the highest requirements and user expectations. Functions are work-safe, convenient, easy to use, and designed keeping in mind user satisfaction and well-being.

ABM™ Balteco was the first company to introduce adjustable backmassage systems (ABM™) – nowadays it has become a standard amongst quality manufacturers. Still, Balteco hydromassage baths offer more through the unique adjustable back massage system. Custom designed water diverter placed on a bath rim allows for smooth manual adjustment of the backmassage intensity from full power of backmassage to no back area massage at all.

ESA™ All Balteco hydromassage baths are equipped with a unique extra safety package ESA™ (Extra Safety Assurance). Package includes: a water level sensor preventing halogen underwater lighting and/or pumps from activating in an empty bath, a water inlet suction with high-volume suction cover and integrated safety valve, and double earthing.

DHP™ For larger interior size hydromassage baths Balteco offers in addition to a standard one pump system also a system with two powerful pumps DHP™ (Dual Hydromassage Power). DHP™ consists of two separately mounted massage systems with separates function and controls. One pump provides for an effective general hydromassage and the other one for the back and footmassage systems.

ETM™ As valuable enhancement to increase the intensity of hydromassage even further, Balteco offers to its massage baths electronic turbo massage systems ETM™ (Electronic Turbo Massage). Electronic function may be activated by an easy touch of a button and water-air mixture pressure from water jets is maximized.

Diverter

Air regulating button

Electronic turbomassage

AmbiLight

Balteco custom designed chromotherapy lighting systems have been designed using the latest RGB LED technology delivering a wide variety of bright color tones or a slow color rotation program. An integrated lamp housing temperature controlling system avoids lamps overheating allowing the lighting function to be safely used also with low water levels or even without water.

AutoFill

An electronic bath fill-up assistance system allows for convenient and safe bath filling. Upon AutoFill activation the water flow from the bath mixer is automatically stopped when bath is full of water and system also gives attention sound signal.

slimline

A stylish minimalist hydromassage bath concept that combines the latest Balteco design and intelligent electronics supporting effective hydromassage system engineered without compromise.
EasyTouch electronic panel allows direct control of every massage area (back, side or foot) and an activation of pre-programmed Therapy program. Waterproof stainless steel buttons are placed on the bath vertical inner wall for an easy access without a need to be getting out of a relaxing bathing position.
Exclusive ultra sleek SlimLine jets from chrome plated brass and stylish accessories blend into the bath surface.

XONYX™

Exclusive series of massive stone baths of Xonyx range offer unique designs and the best SolidSurface technology. Baths are casted from a well mixtured stone mass of resins and various mineral fillers. Latest technology ensures high quality and reliability. Due to superior mechanical characteristics Xonyx™ massive stone baths are very durable, and hence highly value adding and environment friendly.

100% Sanitary Acrylics

All Balteco acrylic baths baths are produced from the highest quality sanitary cast acrylics supplied by Altuglas (France).
The best material for making baths:

- Durable
- Chemically resistant
- Non-allergenic
- Non-porous surface
- Easy to clean
- Low thermal conductivity
- Deep gloss
- Repairable

ACCESSORIES

CHROMOTHERAPY LIGHTING SYSTEM
Underwater lighting system with four ultra bright LED lamps with six different color tones. The lighting system provides for slow and smooth underwater color rotation program or any of the single colors may be chosen. This option is available for any system/bath, except system S11.
Code: KLA*4.

HALOGEN LIGHTING
One-lamp underwater lighting with chrome-plated brass halogen lamp (35W, 12V). This option is available for any system/bath, except system S11.
Code: LA

AMBILIGHT
Powerful one-lamp chromotherapy lighting systems. Using the latest RGB LED technology, AmbiLight delivers a wide variety of bright color tones or a slow color rotation program. This option is available for any system/bath.
Code: AL

AUTOFILL
An electronic bath fill-up assistance system allows for convenient and safe bath filling. Upon AutoFill activation the water flow from the bath mixer is automatically stopped when bath is full of water and system also gives attention sound signal. This option is available for any system/bath.
Code: AF

OVERFLOW FILLING
Bath filling through the overflow. Alternative option for mixers without spout. This option is available for any system/bath.
Code: OS

MECHANICAL TURBOMASSAGE
Turbulent jet flow effect is created through the mechanical direction of both pressurized air and pressurized water into the hydromassage jets. This option is available for combimassage (air+water) systems/bath.
Code: W

SUPERSOFT PILLOW
Code: MSV

WATER HEATER
1,5 kW heater keeps desired water temperature in the bath, by activating only and always along with massage pump. 3,0 kW heater can be individually turned on and off while the massage pump is working, using separate Heater-button.
Code: H1,5 or H3

IMPROVEMENT OF LIVING QUALITY

1

Underwater massage joins the effect of aquatic environment and massage, where the body is simultaneously affected by both the temperature of water and the pressure of water jets on body surface.

6

Heart rate will go up in a hot bath, while blood pressure drops and muscle tone is relaxed. Sweating contributs to detoxification and rejuvenation process of the body.

2

Massage, on its turn is enhanced by applying pressure on specific parts of the body.

7

It is scientifically proven that both mental and physical stress is relieved during bathing procedure.

3

The hydromassage baths, designed by Balteco specifically for domestic use, are part of healthy lifestyle. Massage eases muscle tensions, caused by work or exercise, but also provides relief in the case of many diseases as an additional therapy, contributing to better life quality.

8

In moderate water temperature the heart rate will actually drop, in average, by 6-10 beats per minute. The smaller blood vessels will widen, blood pressure drops and blood circulation improves.

4

The thermal conductivity of water is 23 times higher than that of the air. This provides for excellent means of heat transition and effective therapy.

9

Prolonged hydrotherapy will speed up metabolism and excessive fluids, sodium and potassium will be removed from body, thus balancing skin well-being.

5

The level of at least three different hormones, related to stress, will drop in blood during a bathing session.

10

Long hydrotherapy procedure in water can be enjoyed at a temperature, which matches, more or less, the temperature of body.

SHOWERS

MAKRO

Makro shower corner is a combination of cubicle cabin or screen and complementing shower tray with options of low and high version. Cabin is made of straight transparent (T1) 8 mm safety glass, aluminium profiles and has closing sliding door. WALK-IN screen is made of straight 10 mm transparent (T1) safety glass wall. Tray is made of very strong and durable Xonyx™ massive stone.

Shower tray: 90x120 cm / 90x140 cm / 90x160 cm / 90x180 cm

Cabin: 90x120x200 cm / 90x140x200 cm

WALK-IN screen: 90x160x201 cm / 90x180x201 cm

Shower tray has two possible height options:
- Low base (for in-floor mounting 4,5 cm)
- High base (for on-floor mounting 13 cm; not available for WALK-IN screen)

VIBE

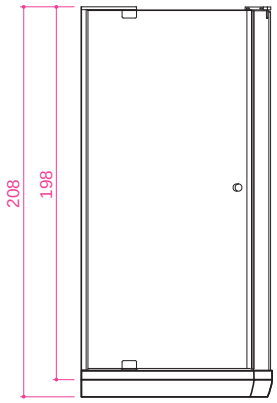
SHOWER CORNER

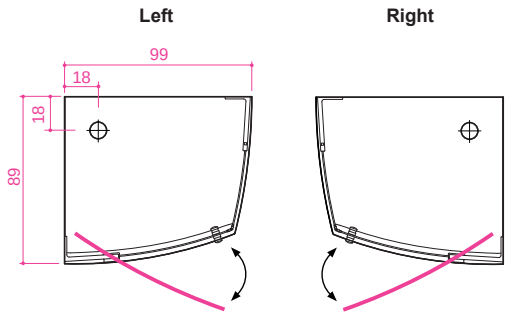
Dimensions:

99 x 89 x 198 cm (low base)

99 x 89 x 208 cm (high base)

Vibe shower cabin is an elegant combination of soft curving shower walls and a complementing shower tray with options of low (mountable into the floor) and higher version. Shower walls are made of transparent (T1) or toned (T2) safety glass (6 mm) – shower door is turning on the hinges. Shower tray is made of very strong and durable Xonyx™ massive stone.





VISIO

SHOWER CORNER

Dimensions:

140 x 90 x 205 cm (low base)

140 x 90 x 212 cm (high base)

Visio shower tray is made of remarkably strong and durable Solid Surface material Xonyx™. The corner consists of: a shower tray (white), front wall of 6 mm transparent (T1) or toned (T2) safety glass, metallic aluminium profiles for wall connection and a chromed brass connection support arm.

MIO

SHOWER PANEL
• Dimensions: 24 x 149 x 33 cm

Mio is a novel form with beautiful flowing lines expressing refined grace. Mio shower panel is casted from Xonyx™ massive stone mixture, a material that is very hard and durable, yet the satin surface finishing provides for softness and warmth when touching.

XONYX™

Shower panel includes:
• Quality thermostat shower mixer N2
(optional regular mixer N1)
• Rain shower
• Minimalistic hand shower
• Hydromassage jets (3) with three spray options
• Concealed shelves
