

COMODULE OÜ project

COMODULE OÜ project (EU53352) „Preparation for Comodule Light Electric Vehicle Product Development“ was funded by the Estonian-Norwegian cooperation program Green ICT, which aims to increase Estonian-Norwegian business cooperation in innovation. The purpose of the small project is to carry out preparatory activities for a major project to develop a durable e-scooter. The technology helps reduce congestion on urban areas, along with this reduce the CO2 emissions. A small project of the Green ICT Action involves partner search and a business and project plan.

Project period - 01.07.2019 – 31.10.2019.
