WOOD WOOL PANELS

## INSPIRATION CATALOGUE

## Inspiration Through a Year of Creation

This past year has been full of energy, creativity, and meaningful collaboration. We've had the privilege of being part of many inspiring projects featuring CEWOOD wood wool panels — spaces brought to life through thoughtful design, innovation, and shared vision. Each project featured in this latest edition of our catalogue reflects not only our commitment to quality but also the inspiring partnerships with architects, interior designers, developers, builders, and homeowners that drive new ideas forward.

It has truly been a busy year. Alongside project work, we have continued to expand our production capacity — building new facilities at our factory to meet growing demand. This development enables us to offer even faster delivery times and a wider selection of acoustic, design, and building panels for our partners worldwide.

We have also remained focused on our sustainability goals, continued our research, product testing, and certification, and strengthened our cooperation with universities. In parallel, we have developed new products that align with the evolving needs of modern architecture and interior design.

At the heart of it all stands our team — passionate professionals whose dedication and creativity turn every challenge into an opportunity. Together, we look forward to another year of inspiring, responsible, and beautiful design.

# Šilainiai Swimming Pool

**Location:**  
Baltų pr. 8, Kaunas, Lithuania

**CEWOOD products:**  
CEWOOD Baffle A2 panels  
Wood wool: 1.0 mm

Colour: White painted  
Fastening: Baffle solutions  
Amount: 539 pcs

**Architect:**  
Tiksli forma

**Builder:**  
Kaminta, UAB

**Photo:** Māris Šmits

As Kaunas continues to expand its network of public services closer to residents' homes, the city has officially opened new swimming facilities in Šilainiai. The complex now features not only an eight-lane swimming pool but also a SPA area with saunas and whirlpool baths.

White CEWOOD Baffle panels immediately catch the eye in the entrance area, creating a bright and welcoming first impression. Beyond their striking appearance, the Baffle panels significantly improve the acoustic quality of the space, ensuring a calm and pleasant atmosphere from the moment visitors step inside. Their natural texture and clean design enhance visual comfort while providing reliable indoor climate and sound absorption—a perfect blend of aesthetics and functionality for any modern public building.

Area: 1300 m<sup>2</sup>

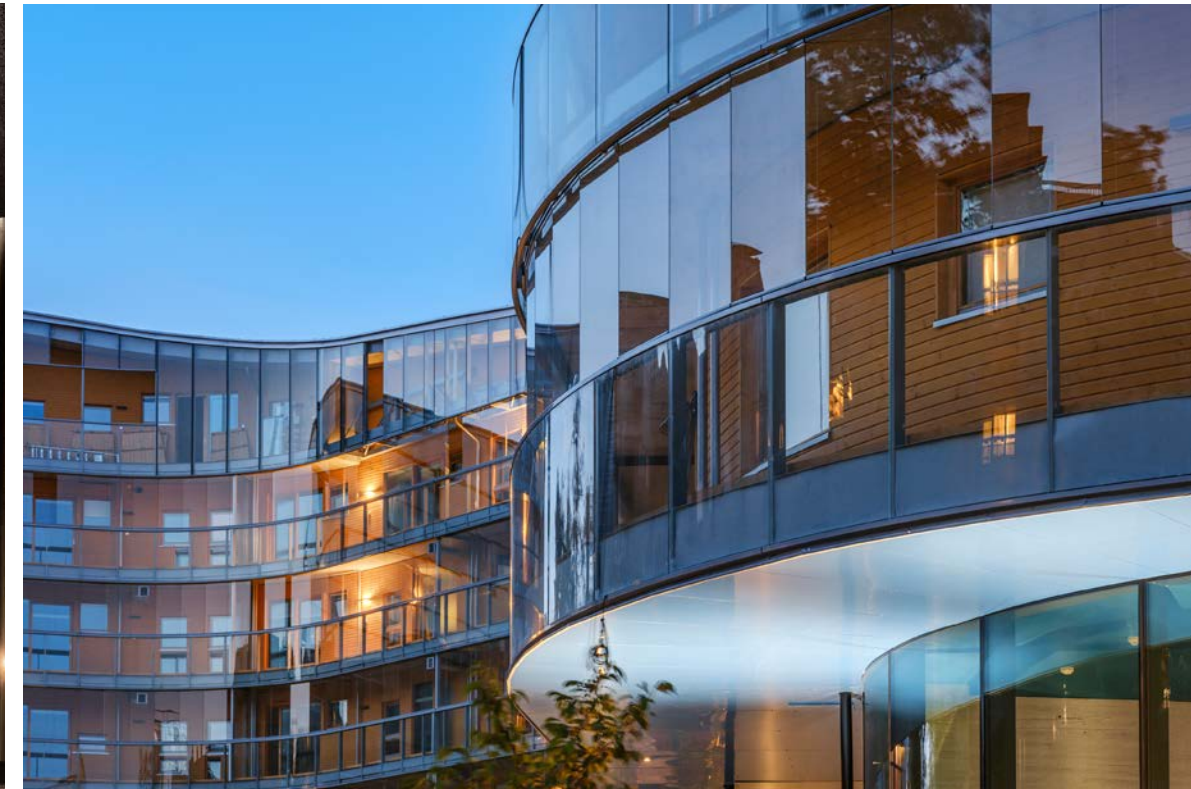

**Architect:**  
Steven Holl

**Contractor:**  
Newill & Bau

**Photo:** Newill&Bau, Jenny Kallio,  
Kuvatoimisto Kuvio Oy

Meander is a residential building designed by architect Steven Holl, located in Töölö, Helsinki. The building is characterized by its curved forms, sculptural architecture, and thoughtful functionality. CEWOOD Acoustic panels were chosen to complement Meander's interiors, where brightness, calm acoustics, and aesthetic harmony meet. The panels are installed particularly in the building's curved corridors and home cinema, enhancing both the sound environment and the atmosphere.

Meander was a finalist for the Finlandia Prize for Architecture and has received several recognitions for redefining modern residential design. Its material choices, architectural language, and technical solutions represent a high level of design and craftsmanship.

## Office in Belgium

Location:  
Antwerp, Belgium

**CEWOOD products:**
