

SORTING IS SIMPLE!

CARDBOARD AND PAPER PACKAGING

Fold large cardboard packaging or tear it into pieces, then it will take up less space. Make sure that the material is clean and dry.

SUITABLE

- Paper and cardboard packaging (cardboard crates and boxes, paper bags, wrapping paper)

PLASTIC AND METAL PACKAGING, BEVERAGE CARTONS

Rinse if necessary to prevent soiling of other packaging. Do not remove corks and lids.

SUITABLE

- Plastic bottles, boxes and cups for consumer goods, food, beverages, cosmetics and grooming products
- Plastic bags, plastic packaging
- Metal packaging (tin cans, canisters, aluminium jars, metal corks and lids)
- Beverage cartons (for milk and dairy products, juices and wines)
- Packaging from other materials

GLASS PACKAGING

Rinse if necessary to prevent soiling of other packaging. Remove corks and lids, but labels can stay.

SUITABLE

- Glass bottles and jars (bottles for soft drinks and alcoholic beverages, jam jars)

UNSUITABLE

- Soiled/moist paper and cardboard
- Soft paper (toilet paper)
- Newspapers, magazines, books
- Paper for copying or drawing
- Paper, cardboard, cartons containing foil or plastic film (for instance: juice cartons, candy and chocolate wrappers)
- Wallpaper

UNSUITABLE

- Plastic and rubber items that are not packaging
- Construction materials
- Clothing and footwear
- Packaging that contains products with hazardous substance markings

UNSUITABLE

- Window glass, sheet glass and mirror glass
- Lamps and light-bulbs
- Ceramic, crystal and porcelain items (crockery, vases, etc.)
- Heat-resistant glass (oven dishes)

You can only place dry and empty packaging that does not soil other packaging in the collection container. Press larger items together before putting them in the collection container.
