

BLUE

Cardboard and paper packaging

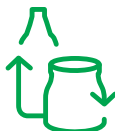

Fold large cardboard packaging or tear it into pieces so that it takes up less space. Make sure the material is clean and dry.

YELLOW

Plastic and metal packaging, Beverage cartons

Rinse if necessary to prevent soiling of other packaging. Do not remove corks and lids.

GREEN

Glass packaging

Rinse if necessary to prevent soiling of other packaging. Remove corks and lids, but labels can stay.

BROWN

Biodegradable waste

Place biodegradable waste in the container either loose, in a paper bag or in a fully biodegradable and compostable bag.

BLUE

Waste paper

Collect paper and cardboard separately from other waste, even if there is no dedicated container in your house. Place waste paper in the container loose.

GREY

Mixed domestic waste

When you collect packaging waste and food waste separately, you contribute to a substantial reduction of mixed domestic waste.

Suitable

- Paper and cardboard packaging (cardboard crates and boxes, paper bags, wrapping paper)

Suitable

- Plastic bottles, boxes and cups for consumer goods, food, beverages, cosmetics and grooming products
- Plastic bags, plastic packaging
- Metal packaging (tin cans, canisters, aluminium jars, metal corks and lids)
- Beverage cartons (for milk and dairy products, juices and wines)
- Packaging from other materials (except packaging from cardboard, paper and glass)

Suitable

- Glass bottles and jars (bottles for soft drinks and alcoholic beverages, jam jars)

Suitable

- Spoiled food and leftovers
- Solid spoiled fruits and vegetables, their skins
- Meat and fish waste, fish bones
- Egg and nut shells
- Household paper
- Paper tissues
- Coffee grounds, paper filters
- Cut flowers, indoor plants without pots

Suitable

- Newspapers, magazines
- Catalogues, advertising materials
- Exercise books, paper and cardboard folders
- Writing and drawing paper with or without print
- Office paper
- Cardboard
- Craft paper
- Envelopes without plastic
- Old books (softcover)

Please note!

Unfit to use
large waste items should be taken to a waste management facility.

Fit to use
furniture, electronics and clothes should be given to friends or recycling organisations.

Hazardous
waste, such as paint, glue, varnish and solvent leftovers in retail packaging, expired medications, chemical and pesticide waste, discarded items containing mercury, combustible and explosive waste and ordinary and rechargeable batteries, should be taken to a waste management facility.

Unsuitable

- Soiled/moist paper and cardboard
- Soft paper (toilet paper)
- Newspapers, magazines, books
- Paper for copying or drawing
- Paper, cardboard, cartons containing foil or plastic film (for instance: juice cartons, candy and chocolate wrappers)
- Wallpaper

Unsuitable

- Plastic and rubber items that are not packaging
- Construction materials
- Clothing and footwear
- Packaging that contains products with hazardous substance markings

Unsuitable

- Window glass and mirror glass
- Lamps and light-bulbs
- Ceramic, crystal and porcelain items (crochery, vases, etc.)
- Heat-resistant glass (oven dishes)

Unsuitable

- Ordinary plastic bags, food packaging
- Cat litter sand, ash, cigarette butts
- Liquid food waste, cooking oil, large bones
- Paper bags with a plastic coating, waxed surface or plastic aperture
- Baking paper
- Old medication
- Nappies, sanitary pads
- Vacuum cleaner bags
- Artificial flowers, candles
- Flower and salad pots

Unsuitable

- Dirty or wet paper and cardboard
- Household paper
- Used paper dishes
- Adhesive tags, tapes
- Foil, parchment paper
- Candy wrappers, ice-cream wrappers
- Wallpaper, laminated paper or paper with a plastic coating
- Tetra Pak containers
- Anything that contains materials other than paper and cardboard

Packaging must be placed in the container loose.

You can only place dry and empty packaging that does not soil other packaging in the collection container. Large packaging must be compacted.

When in doubt, place the item in mixed domestic waste.
