

MODERN UPWIND AND DOWNWIND SAILPLAN

- 1) Jib / Genoa
- 2) Chain plate position
- 3) Spreaders length
- 4) Smaller J bigger E

- Wind channel
- Main overlap

Inhauler managing: light, medium, strong wind

$$\alpha \tan = \frac{B}{J}$$

$$6^\circ \tan = 0,10 = \frac{10}{100}$$

$$7^\circ \tan = 0,12 = \frac{12}{100}$$

$$8^\circ \tan = 0,14 = \frac{14}{100}$$

Example 8°:

J: 5840 mm

$$\frac{14}{100} = \frac{B}{5840}$$

B: $5840 * 14 / 100 =$
 $= 817,6 \text{ mm}$

8°

7°

6°

Symmetrics vs Asymmetrics

- Performance and rating system
- Easy to use

Modern asym design for deep angle
and how to trim
the sails
and boat
