

**GENOKE**

**Protecta Fire Protection Products**  
**October 19, 2017**  
**Tallinn, Hotel Euroopa Conference Centre**

To ensure the fire safety of buildings and the effectiveness of passive fire protection, it is important to use high quality materials and tested solutions. However, it is also important that the fire protection works are carried out by trained installers.

Protecta is a brand which offers a wide range of high quality passive fire protection products. The product range includes various fire protection boards, paints, mortars, intumescent and acrylic sealants and other fire sealing products for penetrations and joints.

In order to obtain the necessary know-how to choose and install a suitable solution, compliant with all requirements, we invite you to attend our seminar on Protecta passive fire protection products.

**SEMINAR AGENDA:**

09:00-10:45 Lectures

10:45-11:00 *Coffee break*
