KLUDI AMBA

Fittings with sensual aesthetics

She's a real beauty: KLUDI AMBA. Sleek, harmonious contours are combined with smooth, rounded surfaces. The flow of water is wonderfully gentle; every touch becomes a sensory experience. Never before has there been a fitting that radiated such emotional qualities.

KLUDI's unique IntegralDesign

KLUDI AMBA looks like it is cast in one piece, as the operating mechanism is an integral part of the homogeneous whole. The discreet red and blue marking is a sure sign: at times this part of the mixer body acts as a handle to regulate the flow of water and temperature. It only becomes obvious when this function is used, then it blends back into the overall form.

KLUDI's novel IntegralDesign is what makes KLUDI AMBA unique. It gives rise to a sculptural appearance that gratifies the senses, such as has never been achieved before so consistently. KLUDI AMBA takes fitting design to a new level.

2013 ■

Intuitive, natural operation

KLUDI AMBA is intuitive to operate, by following the natural line of movement towards the mixer and gently opening up the top of the mixer towards the back. A light touch is enough to start the water flowing. Temperature is regulated with a simple, practised turn. As usual, it can be finely adjusted with pinpoint accuracy.

Finely adjusted with pinpoint accuracy
As usual, the flow of water and temperature are easy to adjust with pinpoint accuracy. Proven cartridge technology is used for the fine adjustment, which is also integrated into KLUDI AMBA.

Discreet marking
The red and blue marking blends discreetly into KLUDI AMBA's overall design.

Graceful drainage fittings
Instead of the entire connecting rod, only the elegant pull knob is visible for the drainage fitting of the KLUDI AMBA mono basin mixer. It butts against the mixer body. As an alternative to a drainage fitting, KLUDI AMBA also provides a push-open valve in the washbasin.

KLUDI SoftFlow - the voluminous, gentle stream of water

The gentle and sensuous design matches the wonderfully smooth stream of water flowing from the KLUDI AMBA wash basin mixer. KLUDI SoftFlow pampers with its gentle volume – every single day.

5 litres per minute flow through the KLUDI AMBA wash basin mixer, which corresponds to the flow class Z. As a comparison: the highest class A allows 14 litres per minute. With its 5-litre water regulator, KLUDI AMBA achieves the ultimate in eco-friendly savings – including a double effect. For the water-savings effect is coupled with a power savings, as less hot water is consumed.

The KLUDI s-pointer allows the angle of the water stream to be adjusted directly at the aerator. This makes individual alignment to any washbasin form easy. A nice feature here: the practical function is integrated into the spout, making it virtually invisible.

KLUDI s-pointer

The KLUDI s-pointer allows the angle of the stream of water to be adjusted directly at the aerator. This makes individual alignment to any washbasin form easy, ensuring more flexibility and less splashing water.

Due to its wide variety and own line of accessories, KLUDI AMBA offers great scope for creative freedom. The beautiful fittings are ideal for personalised bathroom design.

KLUDI AMBA makes every washbasin even more beautiful

These days, modern bathroom design offers a variety of designs and materials for washbasins. KLUDI AMBA looks good in any combination. Mono mixers in various sizes, heights and reaches blend in perfectly with wall-mounted washbasins and fitted washbowls.

Always the right KLUDI AMBA fitting

KLUDI offers mono mixers for fitted washbowls with two spout heights: 213 mm and 273 mm for extra KLUDI freedom of movement between the mixer and the washbasin. Everyone can determine for themselves personally how much KLUDI freedom of movement is desired. With greater height, the possibilities for individual use are also greater.

The diverse product range includes the mono basin mixer in two versions, suitable for large washbasins in bathrooms or smaller hand washbasins in guest bathrooms. The concealed two hole wall mounted single lever basin mixer is available with wall spouts that have a reach of 180 mm or 220 mm.

Sculptural design for modern lifestyle bathrooms

The bathroom is increasingly becoming a living environment. KLUDI showcases this trend. The free-standing bath and shower single lever mixer fit perfectly into modern lifestyle bathrooms with a free-standing bathtub. Its sculptural design showcases the bathtub as a design object.

There are six different bath filling solutions to choose from: whether wall-mounted or concealed, whether single lever mixer or thermostat – modern wellness oases can be fully equipped with KLUDI AMBA.

and shower mixer DN 15

Even surfaces in hand-crafted quality

The extensive skills of an experienced taps specialist are needed to produce something as exceptional as the well-proportioned surfaces of the KLUDI AMBA single lever mixers with shower or combined bath and shower function. Only a closer look reveals the diverter for the shower function. It is perfectly integrated into the combination fitting. The stylish, polished chrome finish is manufactured in a complex process – understated, high-end design in hand-crafted quality.

Design optics with flush wall mounting

The KLUDI AMBA single lever mixers with shower or combined bath and shower function can be mounted flush with the wall.

The effect: the escutcheons, which are normally visible, do not detract from the clean lines. This allows the fitting to become a design object.

A specially adapted thermostat solution is available for this three-way shower installation.

Showering brings double pampering

When two showers are active simultaneously, the shower experience is perfect. KLUDI AMBA makes this possible - with the three-way diverter, which can control two waterways. The combination of overhead, side and hand shower can be freely selected: overhead and side shower, side and hand shower or overhead and hand shower.

KLUDI AMBA thermostats: convenient, safe, with eco-function

Thermostats can be set to the desired temperature in seconds, thus keeping it constant. No time is wasted finding the desired temperature at a full water flow. As a safety feature, the surfaces of the KLUDI AMBA thermostats do not heat up. Additionally, the 38° C hot water stop protects against scalding. A water-saving eco-function is also integrated.

In accordance with DIN EN 1717, the wall-mounted thermostats are inherently safe against backflow and are always beautiful to look at. For a wall mounting, special cover escutcheons ensure that the swivel nuts, which are usually visible after installation, are covered.

38° C hot water stop

KLUDI AMBA thermostats are equipped with a hot water stop to protect against scalding. It is pre-set to 38° Celsius, in line with the human body temperature of 37.5° Celsius. Those who would like hotter showers can unlock the hot water stop at the touch of a button.

KLUDI SafeTouch

Reassuring safety: every child can touch the surface of KLUDI AMBA thermostats without any risk whatsoever, for it never gets too hot. KLUDI SafeTouch ensures this, as the technology prevents the mixer body from heating up. The thermostat casing remains at a neutral temperature.

Thermostat eco-function

A comfortable shower with a 50% water savings: this is possible with the KLUDI eco-function. The shower experience begins with a reduced amount of water that can be manually increased as desired.

Accessories that are as beautiful as the fittings

There is a separate, comprehensive accessory line for the KLUDI AMBA. It is perfectly matched to the fittings, allowing bathrooms to be uniformly configured in the KLUDI AMBA design.

Hooks, handles and brackets have a high-quality chrome finish; insets are made of fine porcelain.
