KLUDI Q-BEO

The epitome of elegance

Precise contours, timeless elegance. KLUDI Q-BEO is the gem on the side of the washbasin or the bath. The clear lines and tensioned surfaces of these mixer collections take their cue from the contour of an elegant perfume bottle – a promise of exclusiveness and elegance that KLUDI Q-BEO, too, can emanate.

The design is well thought through and reduced to the finest detail – edges and projections are avoided wherever possible in the interests of a clear overall aesthetic. For example, in KLUDI Q-BEO surface-mounted fittings, the escutcheons are not visible as would normally be the case: thermostat, shower mono mixer and combined bath filler and shower mono mixer can be installed flush with the wall.

One aesthetic – two design interpretations

KLUDI Q-BEO celebrates the versatility of the cubic form. Thanks to its tensioned surfaces, this exquisitely sleek and minimalist fitting looks smooth and appealing – a surface that just begs to be touched.

What do you prefer? Cubic and exclusive or classic and elegant? The two available operating concepts suit all needs. With the broad lever of the mono mixer that's a pleasure to grasp, using water from the washbasin becomes an intuitive pleasure. For those who prefer something a little more exclusive, there's the three-hole basin mixer. The substantial L spout with its solid, cubic handles is an eye-catcher for more spacious wash areas.

The highlight for the side of the bath

The right mixer for the personal luxury of an extended soak in the bath:

KLUDI Q-BEO embodies pleasure and joie de vivre. Here, too, the cubic handles of the four-hole bath filler and shower mixer on the side of the bath provide an attractive touch and underscore the function of the bath as an exclusive spa in your own four walls – a design element that is followed right through to the elegant, square hand spray.

The showerhead can be poised at an angle of up to 30 degrees and adjusted for an extra measure of personal comfort. The diverter pull knob for the shower function appears almost to hover above the flat, filigree spout of this elegant bath filler – consistency down to the last detail.

Convenient showering

The shower thermostat in matching Q-BEO design guarantees a particularly pleasant shower experience.

The integrated thermostatic element regulates the shower water to the preselected temperature – simply and quick as a flash.

This technology also offers outstanding safety aspects because the body of the fitting features KLUDI Safe Touch, which means it is never more than hand-warm, so there is no chance of getting burnt. An anti-scald limiter keeps the temperature of the shower water to an agreeable 38 degrees – and for those who prefer a hotter shower, there's always the option of pressing the button. Extra safety for households with small children or elderly people.

A gleaming start to the day – showering with style

Compared with a relaxing soak in the bath, taking a shower is a daily affair – one reason for KLUDI to lend the shower area an extra touch of glamour.

The KLUDI Q-BEO line offers an array of exquisite mixer models, providing precisely the right solution for every functional need – from the intelligent concealed version to the uncomplicated wall-mounted version, complete with matching fitting elements, such as wall rail and shower head – all in polished, distinctive Q-BEO design.
