QUALITY CONTROL

The production process is controlled by the quality management system ISO 9001:2015 and is certified by Det Norske Veritas. The products are tested and certified by the Institute for Testing and Certification ITC Zlín in the Czech Republic and OFI in Austria. All products are continuously monitored in our own in house laboratory guaranteeing a high level of quality and reliability.

ALCA – A PREMIUM BRAND

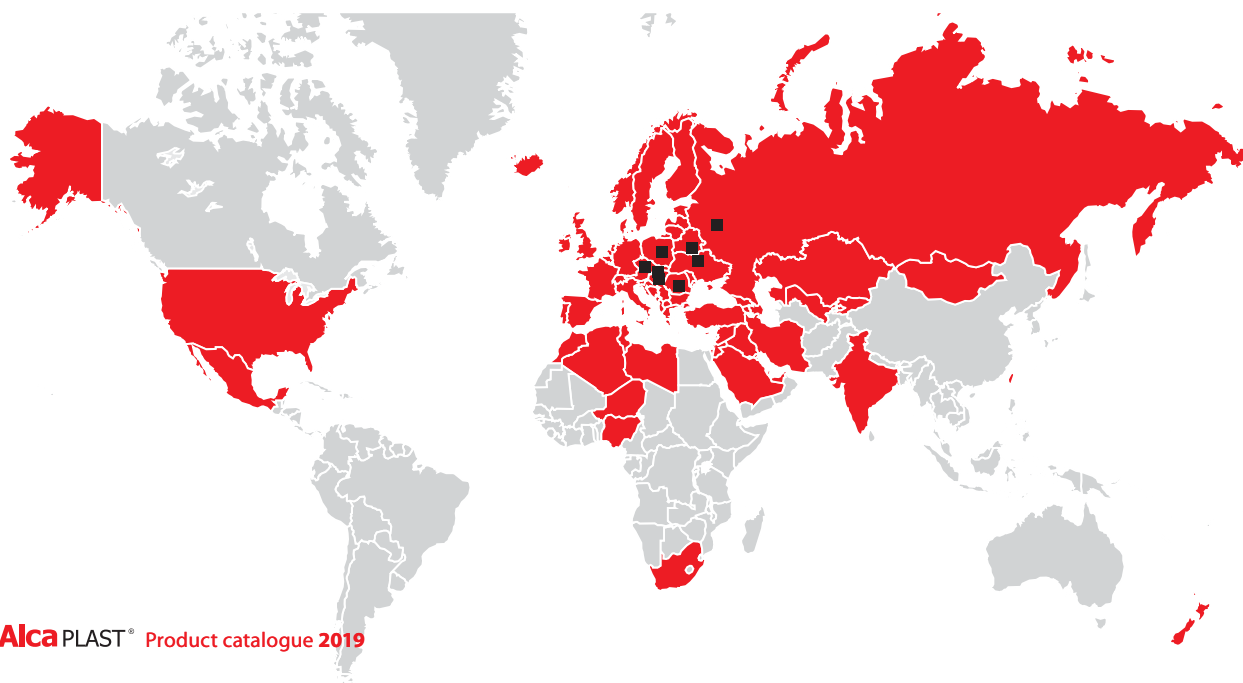

Premium brand ALCA represents a number of design products thoroughly elaborated with high utility value. Alcaplast is the creator of the new trends in sanitary technology. Our cooperation with leading Czech designers in creating new product lines has won us several prestigious awards.

COMPANY FOUNDATION

Alcaplast company was founded in 1998 by husband and wife Radka Prokopová and František Fabiřovic. Since they have started manufacturing of the first inlet and outlet valves in Břeclav, they expanded and upgraded its portfolio of products significantly. Currently Alcaplast with its wide range of products fits into the role of market leader indicating trends on the field of sanitary systems in Central and Eastern Europe, with expansion into many other countries.

SEVEN INTERNATIONAL BRANCHES ALCAPLAST

We design our products so that they can simplify life across many countries. They are universal and they meet demanding international standards. Alcaplast distribution warehouses and sales teams in countries outside of the Czech Republic provide flexible communication and service to our customers.

FLUSH PLATES NIGHT LIGHT AND FLAT – WORLD DESIGN

Alcaplast is a trendsetter in the world of design. This is confirmed by two awards, which the company received in recent years. Prestigious iF Design Award 2018 evaluated the novelty – touch-free flush plate NIGHT LIGHT – the winner in the Product category of the Bathrooms section. Their predecessor, the collection of flush plates FLAT, was rewarded by the jury at the Red Dot Award product design competition in 2014.

CZECH PRODUCTS FROM CZECH ENGINEERS

Quality, technical solutions, innovation, design – these are the primary characteristics of Alcaplast products. High level of professionalism and skill of our Czech technicians is based on the historical tradition of Czech industry, which is over 100 years old, and renowned worldwide for its top quality products that are modern and extremely reliable.

Touch-free flush plates

We introduce our new touch-free flush plates NIGHT LIGHT, the winner of the international competition iF Design Award 2018 in the Product category of the Bathrooms section. Three design variants and sophisticated system of backlight settings and other parameters enables a unique look to any bathroom or toilet.

Barбора Škorpilová

Architect, designer and the creator of the FLAT flush plates, NIGHT LIGHT and M370–M475 for Alcaplast, Barбора is today known for her association with the MIMOLIMIT studio which she founded in 2001.

reddot award 2014
winner

Flush plates FLAT

Elegant and beautiful – this is the right characteristic of the flush plates FLAT. They were designed for the most demanding customers. They meet the demands of modern interior design by their original and clean lines which match the other elements in the bathroom.

The mechanism is fully recessed into the wall, so the flush plate effectively merges with the surrounding tiles.

The plate itself is made of brushed metal, on which fingerprints are not visible. Furthermore, the FLAT flush plates are fully compatible with all our ALCA pre-wall installation systems.

Flush plates FLAT won in a prestigious product-design competition Red Dot Award 2014.

Flush plates THIN

Introducing the new flush plates labeled THIN, which thanks to its flat profile stand out only five millimeters above the tiles. Series flush plates THIN is available in five colours from the traditional white, through the favourite chrome, extravagant gold to black-matt finish. Two new series of flush plates with round design complement the square shapes of the previous range. It's only up to you to choose the right ring color.

WC seats

SOFTCLOSE system – Slow closing WC seat cover

The SOFTCLOSE system is characterised by its slow seat closing action. The mechanism within the hinges of the WC seat ensure a smooth and quiet closure onto the ceramics. A big advantage of this system is to protect the WC pan from damage caused by accidental dropping of the seat. It also ensures greater safety and comfort for the user when handling the seat. It is particularly suitable for public areas and for families with children.

Antibacterial

The majority of ALCA toilet seats have antibacterial properties. The Antibacterial properties are achieved by the Silver compounds within the material. Testing has proven that the bacterial density on the WC seat surface is reduced.

Duroplast

Toilet seats made of high-quality Duroplast material will satisfy even the most demanding Customers. Duroplast material greatly reduces discomfort of sitting on a cold surface of a WC seat.

CLICK system for easy cleaning

CLICK system on WC seat hinges allows for easier and faster cleaning of the WC pan and seat itself. The seat is released from the pan by pressing the two buttons on the inner side of the seat hinges, allowing it to be lifted clear for cleaning. The seat is easily and quickly returned to its original position by pressing it back onto the hinges.

Setting of hinges for perfect compatibility

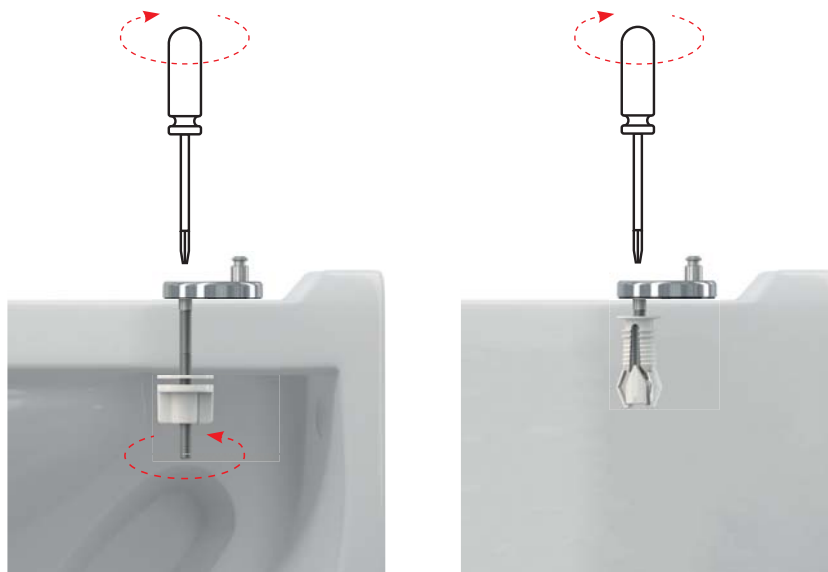

Easy mounting of ALCA seats onto the WC pan is guaranteed thanks to the large range of possible adjustment of the seat hinges. This together with the shape of the WC seats enable them to be fitted to many types of ceramics. The hinges are made of stainless steel and are white powder paint coated to blend them into the ceramic surface, this also ensures long life and durability.

Comfortable top mounting

For Duroplast seats with CLICK system we offer an alternative to the classic bottom mounting hinges. Designed for toilet bowls with limited access the hinge system can be mounted and tightened from the top surface only, eliminating the need to gain access from below.

The integrated seat insert with magnetic holder

Duroplast seats A603 and A606 are equipped with a fully integrated infant potty seat insert. It is attached to the hinge pins and can be easily removed. The insert is made of lightweight polypropylene material so that a child can safely and simply manipulate the seat. When not use the potty seat insert is retained magnetically by the seat cover allowing normal adult use.

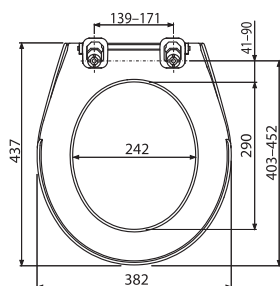

Coloured seats and seats with printing

Duroplast seats A601 and A604 come as standard in four colours – white, bahama, pergamon and pistachio. We also offer WC seats with colour printing in three themes – flower, shell and zen.

Secondary drainage – shower drains APZ1S, APZ101S

The current trend in the construction industry places emphasis on new materials and proper waterproofing especially in wooden construction houses. The new technical solution of our linear shower drains APZ1S and APZ101S ensures moisture drainage between the tiles and waterproofing back into the shower drain body.

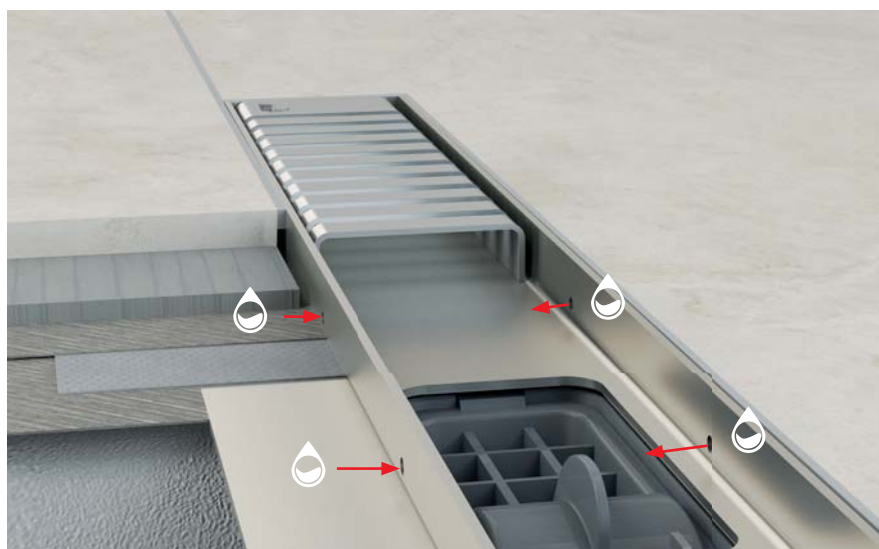

New Trend – Solution for wooden construction houses

- drainage holes in the shower drain body Ø 3 mm
- increased protection of waterproofing in the bathroom

LINEAR DRAINS

Principle of secondary drainage

Water from the shower enclosure primarily flows through the grid into the shower drain and then through a trap to waste pipe. Porous sealings or cracks between the tiles and shower drain can cause humidity leakage under the tiles. The secondary drainage ensures that condensed water from the waterproofing drains through the holes back to the shower drain body. It provides an additional drainage of the shower enclosure.

Professional installation

When selecting this type of shower drain it is absolutely necessary to ensure the correct installation and consolidated waterproofing to be sure the function of secondary drainage works well.

STAINLESS STEEL

These grids have the following codes:

DESIGN – the basis is a stainless steel U-profile, with rounded edges. Two different finishes are available: polished and brushed matt.

POSH – a solid stainless steel plate is attached to the standard U-profile, with clean lines and well-defined edges. Surface finish is brushed matt.

Load class – K3.

GLASS

These grids have the following codes:

GL line – tempered glass

The grids are based on stainless steel U-profiles to which a solid piece of tempered glass is attached, available in a range of colours and with a high gloss finish. The special, toughened glass conforms to the relevant safety regulations EN 12150-2.

Load class – H1.5.

MINERAL

These grids have the following codes:

MI line – artificial stone

The grids are based on stainless steel U-profiles to which a solid, polished block of artificial stone is attached, available in a range of colours and with a matt finish.

Grids are resistant to breaking, cleaning agents and other chemicals. Thanks to their low thermal conductivity, they are not cold when touched. Unsightly stains from drops of water that have dried on its surface are relatively inconspicuous.

Load class – H1.5.

LOCK

- The lock prevents unintentional opening of the lid, overflow of water during heavy rains
- Prevents the access of children at play
- If necessary, it is possible to remove the lock from the rain drum

BASKET FOR LEAVES AND DIRT

- Captures coarse material (mainly leaves) and prevents clogging of sewer pipes
- The narrow bottom with ribs allows a gradual fall through of rotting leaves into sewerage
- Basket can be easily removed for cleaning

INLET RINGS

- They are part of each package
- Diameters 80, 90, 100, 110, 125 mm
- They allow the connection of all types of roof gutters and downspouts

FLAP

- Frost-free odour trap – limits the transmission of gas from canalization
- Prevents the passage of rodents from the waste
- Closes under its own weight and is secured against flooding
- Restrict splashing water from the rain drum when removing the lock case

MATERIAL

- PP enriched with glass fiber
- Resistant to mechanical and thermal damage
- UV stable – resistant to plastic degradation and fading
- In black or grey colours

CONSTRUCTION

- Resistant to deformation during assembly and to the load (class K3 – bearing capacity of 300 kg)
- Ribbing ensures stability on the spot
- Steeper gradient of the rain drum body enables a faster and bigger water flow towards the sewer
- Flow rate 390 l/min.
- Diameter of 110 mm, 125 or 125/110 mm

Determining the length of ALCA bath wastes

Determining the necessary length of the bath waste for different bathtub models is very easy. The waste hole in the bottom of the tub and an the overflow opening in the wall of the tub are combined perpendiculars (Hmax and H2). By adding the perpendicular lines, then we get the desired waste length (L).

$$H_{\max} + H_2 = L$$

Maximum bathtub wall thickness for each type of bath waste and trap
