

Tere Tere!

A new ecological volunteer year started and now it's us, Sonja and Inka who have the pleasure to work for one year in Tipu. After a few days it felt like home and we really enjoy the work in the garden and with the animals. No matter how often the goats jump over the fence and how often we have to run after them through the garden we love them very much.

But the most we enjoy the bees. Together with our intern Natalie we will build a beehive, a wax melter and an info board. We are looking forward to spend the winter with building, sketching and drawing.

Our Estonian Studies goes on really well and we are practicing our skills singing and doing gymnastics in Viljandi.

After a few lovely summer days and a sometimes rainy autumn, we are looking forward to the winter and hope to get a lot of snow.

Best regards

Yours Sonja and Inka
