

Tervist!

Just like every year there are new volunteers in Tipu, us: Nis and Felix. We have worked here since September and are despite Corona settled in pretty well.

After years and years of sitting in school the time flies in Estonia and we became fond of the work. We even like the duck mother which repeats to flee from her enclosure so that it looks more like a prison now.

But we are especially into the rabbits. In mid-September one of them gave birth to seven little cute looking rabbit babies. Now we can watch them continue to grow and becoming bigger and faster.

At the moment we are building a new donation box in shape of a miniature version of the school building. In hope of plenty of donations. We choose to restore the old nature ceiling as a more extensive project for the next time.

After almost 4 month in Estonia we look forward to a hopefully long and snowy winter and many new experiences .
