

BUSINESS OVERVIEW

BHC Laboratory OÜ is a cyber capability development company for a wide range of global customers offering strategic-level cyber exercises, an array of technical training courses, and comprehensive security assessments and consulting.

At the center of our competence is our team that consists of highly qualified cyber experts with experience in countering the most complex threats emanating from the cyber space. Our solutions are developed over time and proven in practice: our company was established in 2010 while the experience of our team members spans much further. This strong background in successfully dealing with real-life challenges helps us to better meet the requirements of the client, ensure realistic approach to exercise solutions and thereby create a unique training experience.

BUSINESS PRODUCTS

BHC Laboratory offers solutions across two main areas: trainings and consultancy. We offer strategic-level cyber exercises and platforms; we provide advanced technical training courses (incl. CSIRT trainings) accompanied by highly realistic simulation environments; we deliver comprehensive security assessments and consulting; and we conduct complex penetration testing of client IT systems and devices.
