

BUSINESS OVERVIEW

CybExer Technologies OÜ is a NATO-awarded Estonian cybersecurity company with the mission to empower people and organisations in ensuring their cyber security. CybExer's focus is on the human aspect of cybersecurity. It ensures that risk factors related to human behaviour are minimised. It enables swift decision-making and rapid operational response to cyber threats. CybExer's risk-based approach helps organisations prioritise their investments and efforts to improve readiness and effectiveness within their budget constraints.

BUSINESS PRODUCTS

CybExer Technologies offers strategic and technical level cyber exercises & training, cyber hygiene e-learning platform and various visualization tools that increase situational awareness. CybExer covers a full spectrum of solutions, from our independently deployable standard solutions to fully customised based on substantial client-expert interaction, and everything in between. Together with our delivery partners, we offer a comprehensive roadmap towards ever increasing robustness and continuity in the face of evolving cyber threats.
