

Cleveron 401

- > Cleveron 401 is a robotics-based click and collect automation solution

- > Holds up to 500 parcels on 5.4 m²
- > Parcel pickup in 12 seconds
- > For indoor and outdoor use

DISCOVER MORE / cleveron.com

How does it work?

1. A parcel is inserted into Cleveron 401
2. Cleveron 401 measures the parcel's height
3. The parcel is stored in the most space efficient way
4. The end-user inserts or scans the pickup code
5. Cleveron 401 issues the parcel, which takes an average of 12 seconds

1. User console with:
 - > UI touchscreen
 - > two 2D scanners
 - > motion detector
 - > safety curtains
 - > security cameras
2. Parcel gateway with:
 - > automatic height measuring
 - > parcel camera
3. Parcel lift
4. Eight storage columns
5. Digital signage screens
6. One-size trays for all parcels
(max parcel dimensions 60 x 40 x 40 cm)
