HERRINGBONES PATTERN

HERRINGBONES

The aesthetics and timeless elegance of a herringbone floor is unique.

Herringbone patterns tell the story of castles, classical mansion houses and museums. They can also play a magnificent role in modern and classic homes.

MIKS HERRINGBONE?

Kalasabamustri ajatu elegants

Kalasabamustriga põrandad räägivad lugusid kindlustest, klassikalistest mõisahäärberitest ning muuseumitest.

Kalasabamustrilistel põrandatel on oluline roll ka kaasaegsetes ja klassikalistes kodudes.

SOLIDE CLICK 30 **HERRINGBONE**

Saadaval juunikuust 2020

- Uus jäik (rigid) LVT kollektsioon / Herringbone
- 3 ehedat naturaalse tamme disaini
- Väikesed mõõtmed (122*610 mm)
- Üldpaksus 4,5 mm / kulumiskihi paksus 0,30 mm
- Uus I4F klikk-ühendussüsteem
- Integreeritud akustilise aluspõhjaga (21 dB)
- Madal VOC, ftalaadivaba ja 100% ümbertöödeldav

SOLIDE CLICK 30 HERRINGBONE

Saadaval juunikuust 2020

- Saab paigaldada otse keraamiliste plaatide peale
- Suurepärase löögisummutusega
- Lihtne paigaldada
- Sobilik niiskettesse ruumidesse ja põrandaküttega aluspõrandatele
- Suurepärase kulumiskindlusega ja kerge puhastada tänu PUR Ecoprotec™ pinnatöötlustele
- Parem siseõhu kvaliteet

ECO30 HERRINGBONE

Saadaval juunikuust 2020

- Uus alusele liimitav LVT kolleksioon / Herringbone
- 3 ehedat naturaalse tamme disaini
- Väikesed mõõtmed (122*610 mm)
- Üldpaksus 2,00 mm / kulumiskihi paksus 0,30 mm
- Madal VOC, ftalaadivaba ja 100% taaskasutatav

ECO30 HERRINGBONE

Saadaval juunikuust 2020

- Hea hinna ja kvaliteedi suhtega
- Suurepärase kulumiskindluse ja lihtne puhastatavus tänu PUR Ecoprotec™ pinnatöötlemisele
- Parem siseõhu kvaliteet

ECOCLICK30

4-SIDED 3L TRIPLELOCK HERRINGBONE

One piece drop-lock system.

CUTTING PLANKS

Lay down the first plank (A) on a leveled surface and place the T-square on top. Make sure the T-square is placed exactly on the corner. While holding down, make an initial cut with the utility knife. Next, place the plank on a higher surface and push down the pre-cut part of the plank to make it snap. Pull the snapped piece upwards to remove completely.

INSTALL 2ND PLANK

Take a second plank (B) and drop it with the long side engaging against the first plank (A) on the short side.

PREPARATION

Tools needed: a tape measure, pen, utility knife, T-square, soft rubber mallet, disassembling wedge.

INSTALL 1ST PLANK

Place the first plank (A) with the cut side against the wall at a 45° angle.

ALIGN AND LOCK

Use the T-square to align the two planks perfectly. Then, tap gently with the soft rubber mallet to lock the planks.

INSTALL 3RD PLANK

Place a third plank (A) with the long side engaging against the second plank (B) on the short side. Again, use the T-square to align the two planks perfectly and tap gently with the soft rubber mallet to lock the planks. Make sure the profile of all planks is facing inwards.

ALIGN ROW AGAINST WALL

After finishing the first row of assembled planks, push it gently all the way against the wall.

FIRST PLANKS A, THEN PLANKS B

Continue each next row by placing all the planks A in a row first, followed by all the planks B. Continue in this way up to the opposite wall is reached. Fill the remaining openings as in figure 9

LAST PLANK IN ROW

Repeat the process until you reach the other wall. Once there, measure the distance from the plank to the wall (including the width of the plank). Mark the measured length of the final plank and cut the plank at a 45° angle at the measure length. Then place the plank following the previous instructions.

FILL IN THE GAPS

Continue by filling in the gaps towards the wall, cutting and measuring the planks as you have previously done. To connect the new plank to the previously assembled row, lift up the assembled planks. Slide the new plank underneath and drop down the assembled planks. Always alternate planks A and B until you have filled all gaps. Don't forget to lock the planks.
