

Better than the original

HPS - High Performance Standard

Track control arms
Product group 19

Ball joints
Product group 19

Hybrid Wipers
Product group 104

Disc brake kits
brake rotors and pads (some HPS parts)
Product group 47

Suspension arm repair kits
Product group 19

Stabiliser links
Product group 19

Tie rod ends
Product group 19

Be better than average with MAPCO® HPS products.

Automotive replacement parts from MAPCO® Autotechnik are always manufactured to OE quality. But should our meticulous engineers find that the OE manufacturers' workmanship is demonstrably below par or that technical advances are possible, the parts are redesigned. The goal: a High Performance Standard (HPS) significantly exceeding the quality of the original parts. As a result, HPS spare parts from MAPCO®

Autotechnik GmbH are technically innovative, their resistance to wear ensuring a long service life. For instance HPS stabilizer bars are manufactured with round bar steel from 12mm thickness compared to the 8mm thickness of most OE manufacturer parts. This way the HPS version has a much lower probability to bend and hence a longer life span. MAPCO® HPS products combine innovative engineering with low wear and tear.

HPS - High Performance Standard

HIGH PERFORMANCE STANDARD
for stabiliser bars

12 mm round steel

- Stronger resistance to bending or buckling under higher loads
- Reinforced round steel

Utilisation of semi-synthetic grease

- Semi-synthetic grease for long life lubrication of ball joints
- Higher protection against corrosion
- Reduced slip stick

Mirror-finished surface

- Reduction of abrasive wear und tear
- Increase in service life
- Shorter running-in period

Special boots

- Increase in the range of operating temperature
- Improved durability of the boots

TÜV certified

Quality products from MAPCO® are tested in Germany and have proven successful worldwide

The High Performance Standard is not an empty promise. MAPCO® has had its HPS technology certified by TÜV Rheinland, with selected functionally relevant quality characteristics of the components undergoing testing. The list of criteria, which is adopted on a voluntary basis, examines for example the strength of the used materials and the stability of sealing boots under environmental influences, as well as assessing the wear at the rod ends. Following successful testing, TÜV Rheinland certified the HPS components and

awarded the TÜV signet. With these customized ID numbers, the certificates can be viewed at our MAPCO® homepage and at www.certipedia.com. MAPCO® products are not only sold in Germany but globally and therefore are directly available in a variety of countries. Many customers swear by the tested quality out of Germany. The great success in a lot of countries is proof for the capabilities of MAPCO® products and customer satisfaction worldwide.

Wide selection of products, constantly available from stock and brought quickly to the customer

Products of MAPCO® Autotechnik have been sold in the millions. As a manufacturer of high quality spare parts MAPCO® offers more than 20.000 items for brands from Alfa Romeo to Volvo. MAPCO® owns multiple central warehouses in Germany and a variety of warehouses all over the country and throughout Europe called Regional Centers. That is why MAPCO® parts are always nearby and quickly and reliably available to our customers.

MAPCO® products cover a considerable range of mechanical and electronic replacement parts that is divided into five columns:

- Steering/Suspension parts
- Brakes
- Drive Train/Bearings
- Engine environment/Filters
- Electric/Accessories

TecDoc award for MAPCO® Autotechnik

The data quality of MAPCO® is outstanding as well. Hence MAPCO® is a „TecDoc Certified Data Supplier“. Especially our customers from dealerships to workshops benefit from a clear data structure that makes the identification of parts such an easy task.
