

Working hours estimation and optimum amount of workers

Model	Installing (measured in hours, h): structure + osb + roofing + insulating + exterior finishes + doors, windows	Optimum amount of workers
Solo Hobby	130...160	2
Solo 57	170...210	2
Solo 75	225...275	2
Solo 100	300...360	2
Duo 57	300...360	2
Duo 75	400...480	2
Duo 100	520...640	2
Duo 120	630...770	2
Trio 57	630...770	2...4
Trio 75	855...1045	2...4
Trio 100	1125...1375	2...4
Trio 120	1350...1650	2...4
Trio 150	1700...2100	2...4

Average installation time for the optional extras

Erecting dormer	16h
Installing skylight	4h
Interior cladding installation	1m ² = 0,45h

Notes

Keep in mind that those working hours are just estimates. The real hours depend on the workers speed and their skills.

This working hours estimation doesn't include the time to do the plumbing, wiring, HVAC, bathroom finishes, kitchen etc.

Get accurate working hours estimation from your local builder. Avrame is not responsible if the displayed working hours aren't the same as the local builder suggests.

Full budget calculation

Our self building guides provide you a lot of guidance when calculating out the full budget of the house. Get your copy [over here](#). The more you plan your project ahead, the less chances there are to go over budget.
