

“Looking for Cowslips” observation form

Date:

Name and contact of person:

Site location: *(name of the town, village, coordinates):*

How many cowslips do you see here?

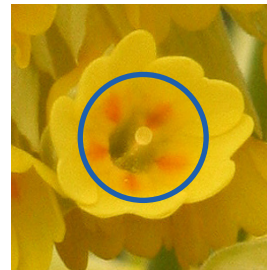

- Few (some plants, up to 100)
- Average (about 100-200)
- Very much (over 200, in thousands)

Examine closely 100 flowering cowslip individuals, mark how many of those are L-morphs (one stigma visible from above) and how many S-morphs (five anthers visible externally).

See an example below how to mark plants (5 in a box).

S-type

L-type
