

Introducing

# HIVE

Get free GNSS station  
management service with  
unlimited raw data storage.

**HIVE** is a free online platform for GNSS reference station owners that gathers raw GNSS data from any number of ground-based reference stations, stores it in a cloud and delivers RINEX files and RTK corrections to end-users.

As a CORS owner, you will receive free HIVE service forever along with the ability to sell GNSS data from your station.

**HIVE** is compatible with any hardware that supports industry-standard protocols.

# 5 REASONS TO CONNECT YOUR CORS TO HIVE

## FREE SERVICE

Connect your reference station to **HIVE** and use it as a free software for generating RINEX files and RTK corrections from it. **HIVE** works with any number of stations minimising station ownership costs. The only thing you have to provide yourself — a stable internet connection.

## COMPATIBILITY

If you already use any software for CORS management but still eager to try **HIVE**, you won't need to dismiss it or change your business processes.

**HIVE** might be used simultaneously and work as a smart back up.

## MONETISATION

After your station becomes fully integrated into **HIVE** we'll propose a clear business model that will show how you can earn money by selling GNSS data from your reference station.

## STABILITY GUARANTEE

**HIVE** is deployed and functioning 24/7 on reliable servers. You'll be able to easily get access to your data from any device connected to the internet.

## TECH SUPPORT

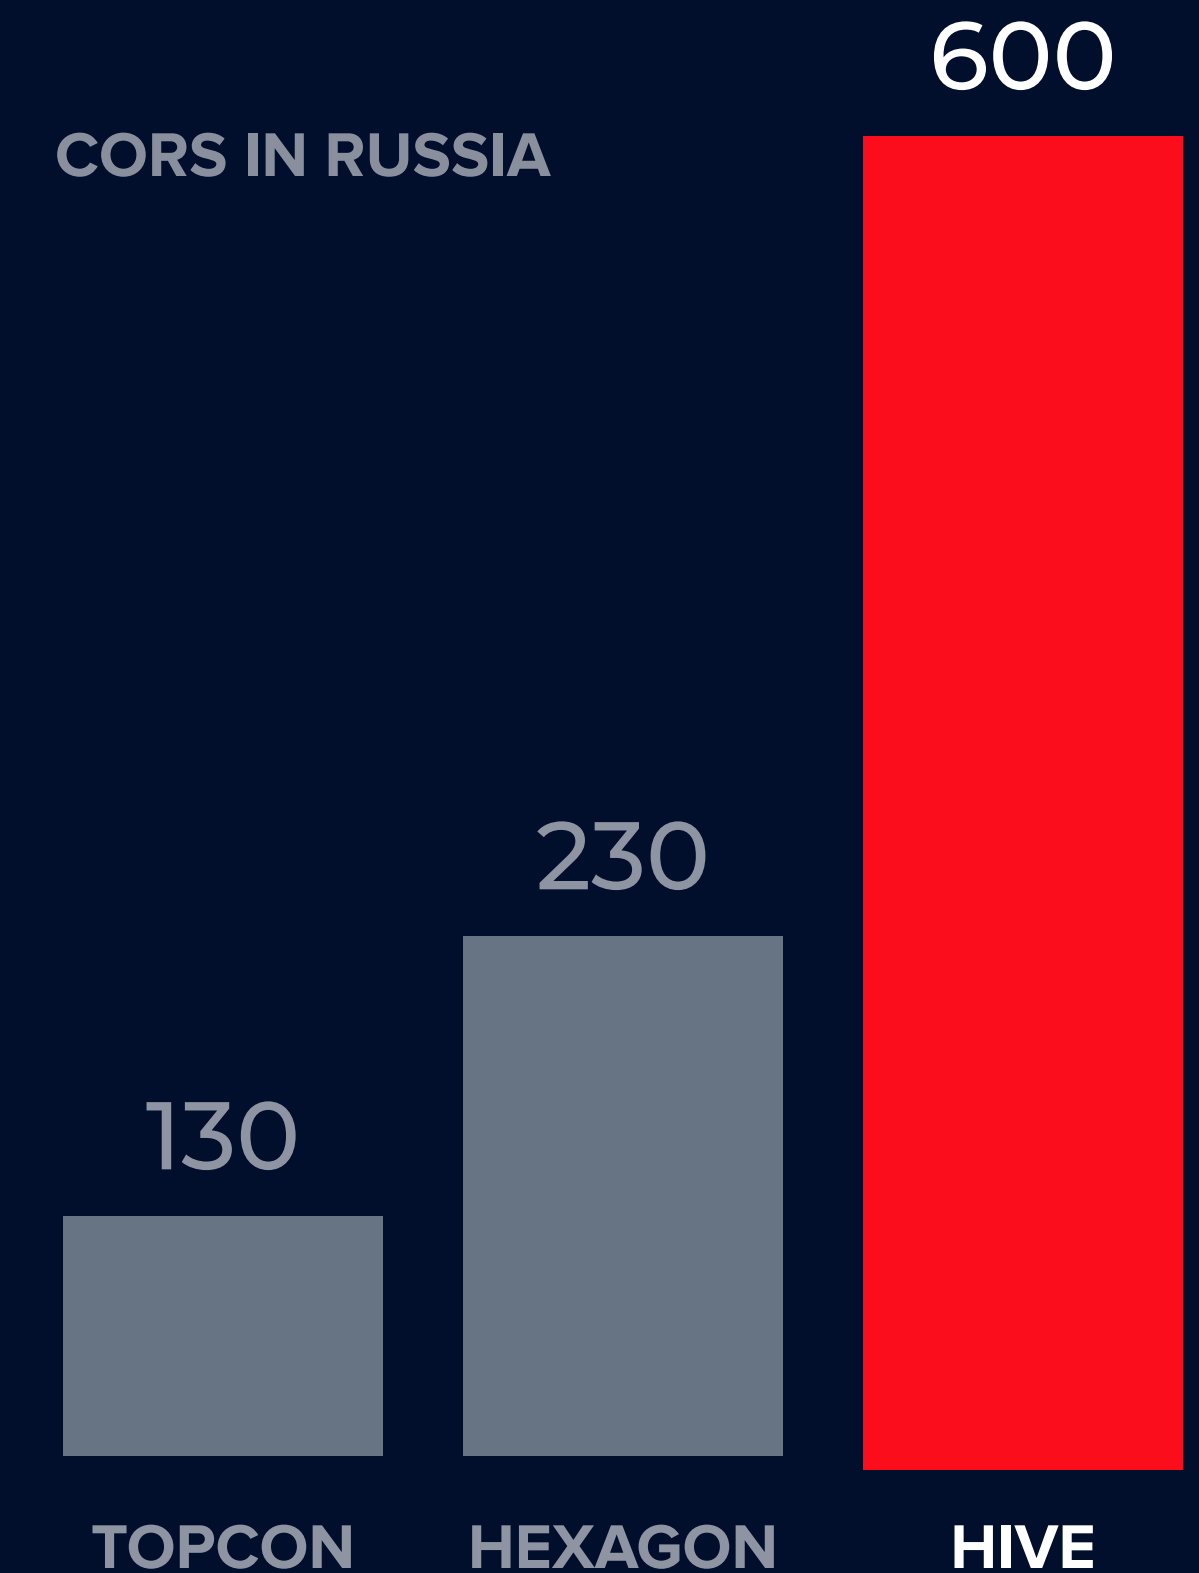

Our team is dedicated to provide as much help as needed during all stages of **HIVE** integration. For free.

# IN ITS FIRST YEAR HIVE BECAME THE BIGGEST REFERENCE STATION NETWORK IN RUSSIA. WHY?

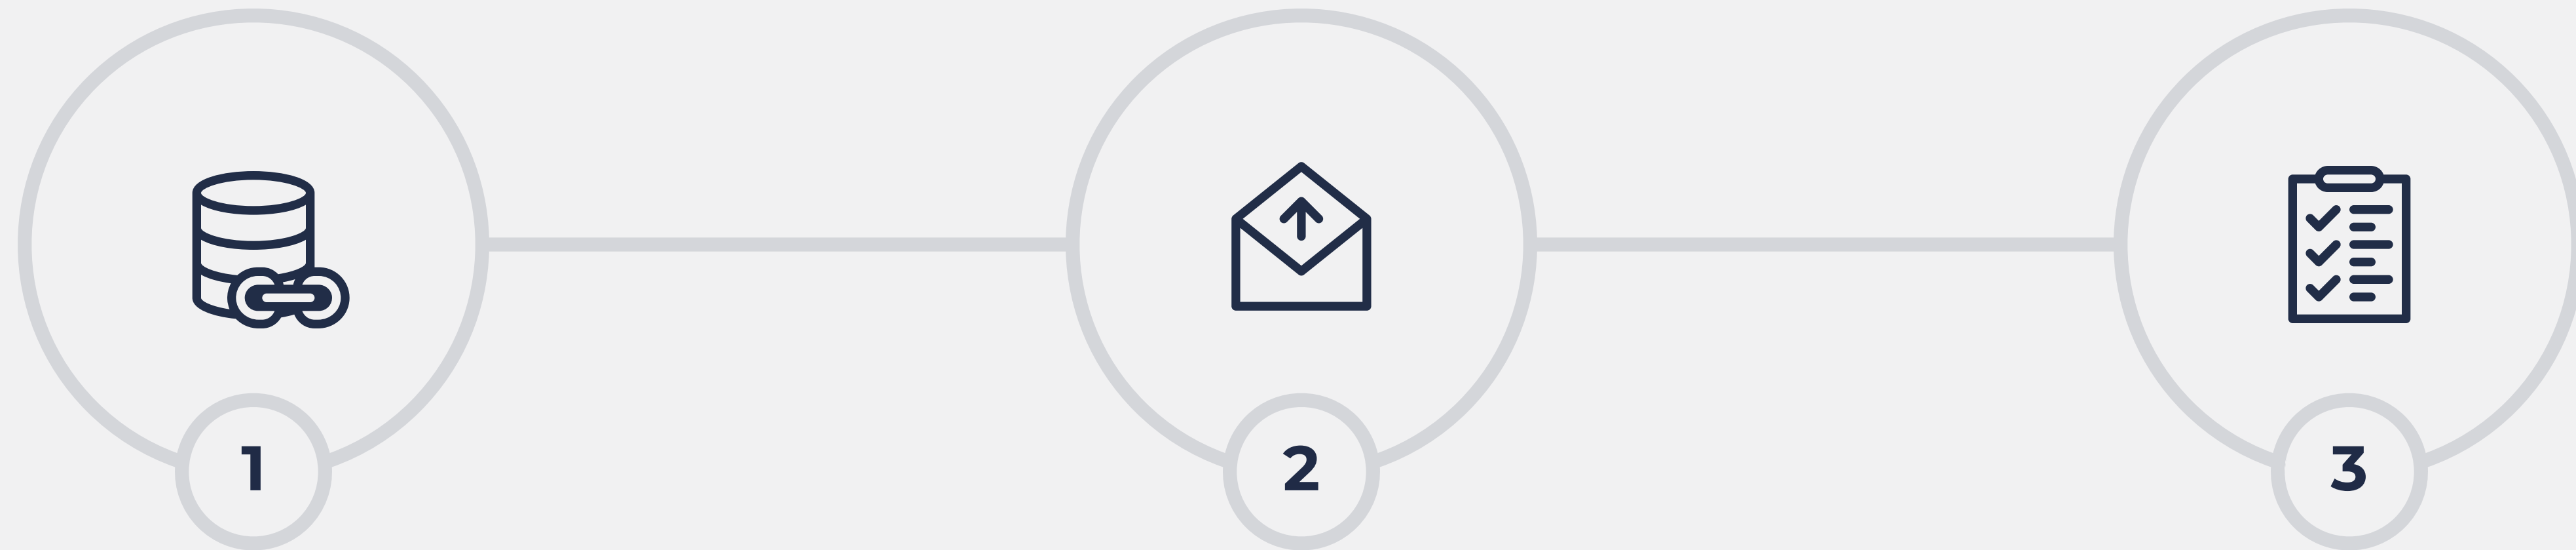

Government and scientific organisations, commercial companies and sole CORS owners connect their stations to **HIVE** for a number of reasons:

- 1 Radically cut down web server costs as **HIVE** provides free cloud storage.
- 2 Use **HIVE** as a way to expand business.
- 3 Get rid of CORS network administration burdens.
- 4 Save on internal support team.

HIVE unites hundreds of stations owned by more than 60 organisations.

# 3 STEPS TO **START**

## CONNECT

Provide a stable power supply and an internet connection in order to make your station available to users 24/7.

## CONTACT

Contact our team at [hello@prns.io](mailto:hello@prns.io) and we will help connect your CORS to **HIVE**.

## COMPLETE

For a couple of weeks your station will operate in **HIVE** in test mode while we will get metadata and get its ITRF coordinates.

If you have any queries don't hesitate to write us an email.  
We will be glad to help.
