

EBIHEN 16

Classic wooden open sailboat

In the era of plastic and aluminium powerboat domination, an honest and traditional wooden sailboat gives you the true feeling of nature.

JRCRAFTYARD.EE is specializing in building custom-made small and medium-sized wooden boats.

Our line of models includes the designs of French naval architect **Francois Vivier** - perfect choice of wooden classic open sailboats and trailerable cabin cruisers. Check more of his designs at www.vivierboats.com

"Ebihen 16" is a seaworthy, stable boat with good carrying capacity, suitable for family sailing, as well as fishing. Despite its short length, it offers a big and pleasant cockpit. She was inspired both by fishing boats of Northern Brittany and Lower Normandy.

An outboard motor is fitted in a well aft of the cockpit, with the motor handle at helmsman reach. The propeller is just ahead of rudder for good manoeuvrability. A heavy steel centreboard and ballast water tanks improve stability and good windward ability.

The hull is made of 10mm okume marine plywood and fully sheathed in fibreglass both outside and inside for extra strength and durability. Cockpit interior and deck is solid sapele mahogany treated with teak oil.

All hardware is custom made marine-grade stainless steel. The boat comes with tanbark coloured custom made mainsail and jib.
