

# Presentation and update on the TCA/NET Cooperation Platform

State of affairs 27.09.2022

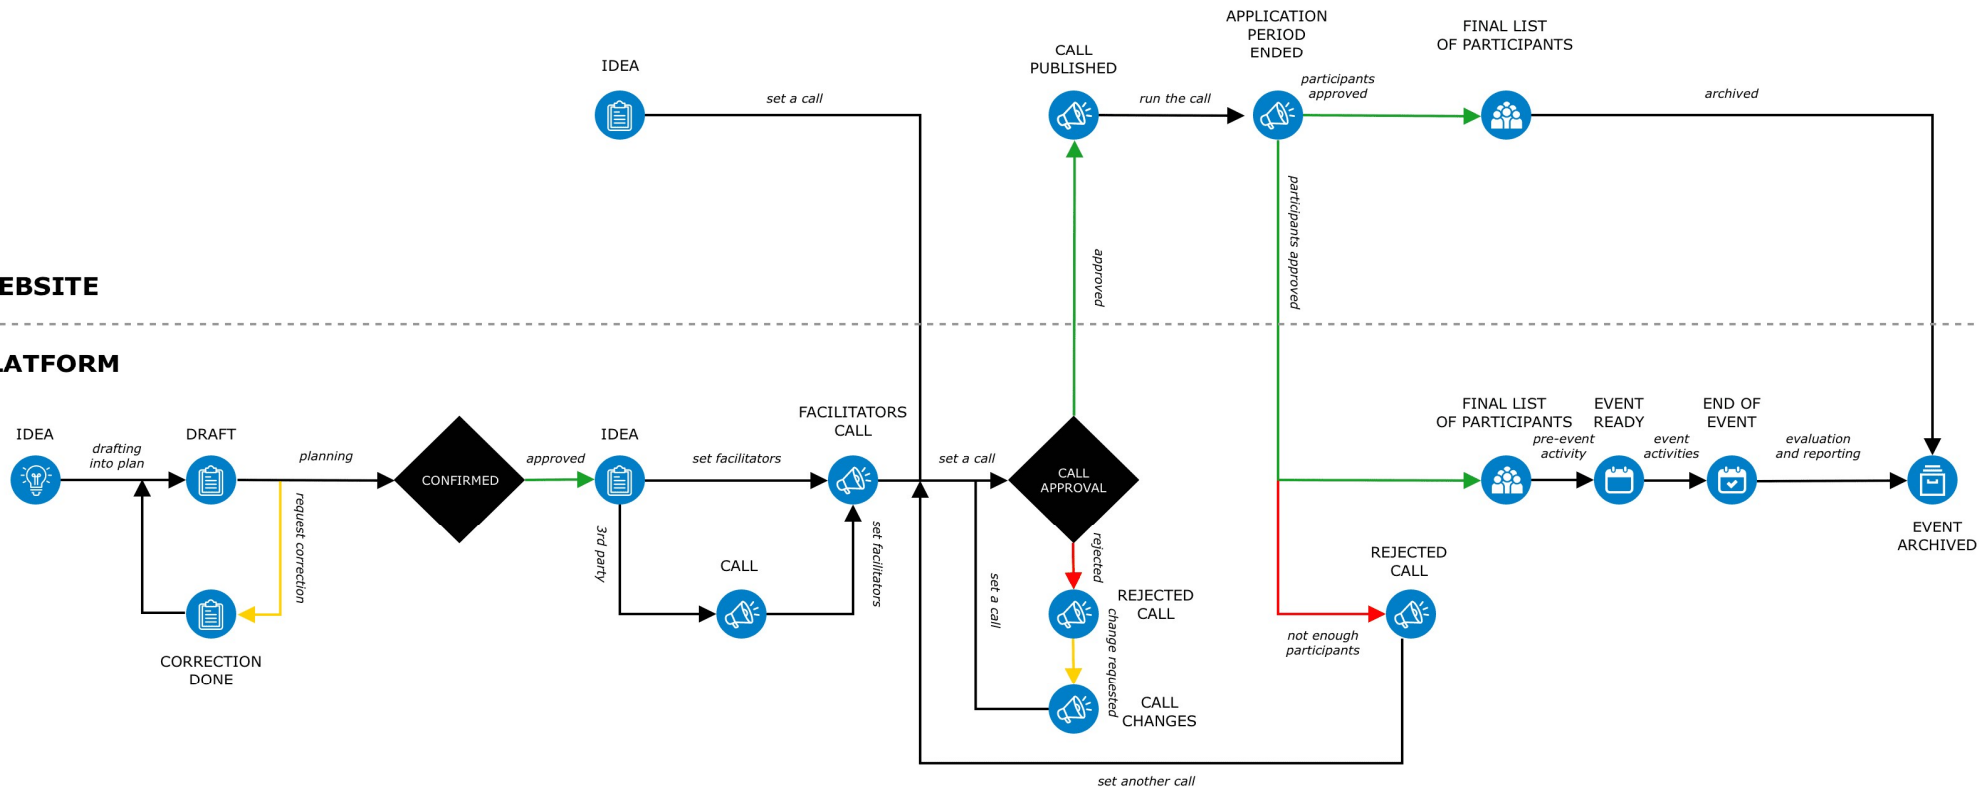

## Main information – where are we?

- Shared database with SALTO Website (because of joint features).
- Structure defined taking as starting point calls for participants → feature common to both the Platform and the Website
- Trial with training course being developed right now
- CMS editable mostly by us
- API to connect with database has been created

AND REPORTING

## Main information

The Platform is built for TCA/NET activities (and their cycle) but will include:

- General budget monitoring
- Storage space for Business Meeting documentation
- KMST staff training (same flow as TCA/NET activities) and storage space

## Focus

- full workflow access
- full overview
- customisation
- user roles and access
- administration of platform and the website
- data access
