<b>Opacity [%]</b>	ISO 2471	> 98
<b>Chromaticity (D50 / 2°)</b>	ISO 13655	L*94,3 a*1,0 b*-5,0

The ink amounts must be adjusted to the paper. Please reduce the single colors cyan, magenta, yellow and black (ink restrictions) and shorten the maximum amount of ink (ink limit). This will help your costs on inks and improve your drying performance.

Please follow the recommendations of the printer and ink manufacturer.

The temperature for preheating and drying the media should be checked previously to make sure you will achieve desired results.

Pasting application: After wetting the paper should be kept in a plastic box in order to wet the paper sufficiently. We recommend to keep the Paper wet for at least eight hours. Longer periods of time don't have any negative impact on the paper. The user is responsible for appropriate microbiological precautions. In the event that the paper is exposed to severe climatic conditions, or if it needs to be used for a longer period of time, lamination is recommended.

It is advisable to protect the edges and corners if the billboard hoarding is regularly cleaned. To maintain the high quality of the paper, it should be stored and converted in a climate of 30 – 65 % relative humidity and at a temperature of 10 – 30 °C (50 – 86 °F).
