FIRE HOUSE TRAINING MANIKIN

FOR PROFESSIONALS WHO SAVE LIVES

Ruth Lee is a family business whose core values revolve around the care of our employees, service to our customers and uncompromising product quality. We are proud to serve YOU, the dedicated professionals who make such a valuable contribution to society.

We employ highly skilled people and source the most durable materials to ensure our products meet the highest international standards.

Our manikins are designed to represent the correct anatomic weight distribution of a real person, and we offer a range of different models to suit every conceivable scenario. This ensures that your training is as realistic and as effective as possible; preparing you for all eventualities.

FIRE HOUSE TRAINING MANIKIN

IDEAL FOR THE FOLLOWING TRAINING SCENARIOS:

BA snatch rescue training in fire houses and 'hot fire cell' training. Manikins will withstand temperatures of around 160°C at floor level (400°C at the ceiling)*.

SPECIAL MATERIALS:

Carcass constructed from the same flame retardant Polyester (conforms to BS EN ISO 15025:2002) used in Police ballistic/stab vests & reinforced with 38mm Nomex webbing to avoid becoming brittle and melting. Protective overalls are non-flammable; constructed from a special Nomex blend material (conforms to EN ISO 11612), and reinforced with Nomex webbing to improve abrasion resistance. They are fitted with 20mm Kevlar ties, as standard Velcro fastenings melt at high temperature.

FEATURES & BENEFITS:

- Anatomically correct weight distribution to give the 'feel' of an unconscious casualty.
- Tough enough to withstand being buried under concrete or steel lintels.

- Soft body joints eliminate the risk of pinch welts and bruising; common injuries when using plastic bodied manikins.
- An immobilisation/extrication collar can be fitted around the neck of our adult manikins to promote proper casualty care.
- Comes complete with overalls, boots and separate Nomex hood to cover the head, which are easily replaced if damaged.

NOT SUITED FOR:

- *Direct exposure to naked flames or excessive temperatures.
- Use in water – See our Water Rescue range.

EXTENSIVELY USED BY:

- All UK Fire & Rescue Services.
- Airport Fire & Rescue Services.
- The British Ministry of Defence (MOD).
- Equivalent organisations across North & South America, Europe, Australia and Asia.
