

Technical data sheet: **SLIM fiberglass mesh**

SLIM fiberglass mesh is a super thin, flexible and durable fiberglass mesh with a mesh size of 2.5x3mm. SLIM glass fiber mesh is intended for use as reinforcement in flooring systems and, thanks to its flexibility, even for complex façade shapes. It is ideal for strengthening the substrate before applying microcement.

Optionally, it can be pasted with CONGRUNT primer or CONWET dense, liquid polymer using a microfiber/velor roller.

Technical data:

Warp	30x2/10cm
Weft	36/10cm
Weave	semi -leno
Raw material	50g/m ²
finished material	60g/m ²
Osnowa N/5 cm	1072N
Thread N/5 cm	1102N

Tolerances:

- placement +/-5% warp, weft
- width +/- 1%
- length -0%, + 1%
- weight +/- 3%
