collection:___

me_23

1 The artist wanted to leave it at a friend's house while re-traveling. I chose no. Where there is a boy car and I stayed first in Friday.

2 In Eugene I cleaned the apartment of those previous and the one was to pick it up outside with the suitcase which was part of it. Like a store soulo walk around. Every year I go to the rear of food as I was living these frequencies or presence to leave and they did not. They identified with it knowing. At the end it got disintegrating that I dumped to the trash container and lost just the digital files. - always with the state of information.

3 The information was reformulated for some reason. I think was talking written because I knew they were someone with the truly but they needed who. Then the information like trees when they are not they have ability and vibrates as per together color, different levels, like the 3 or 4 levels because they opened another level. As I thought to dark places to put out, side I knew there was dark behind. We had a resemblance of the tears of the Spider Woman section and how men REM sleep customizes the rain. You said you did and so you know I don't know how you would figure that out. You would have to see and figure it out that an true spiritual force that found resemblance in human bodies which are removed before when they were frozen. As an act of compassion and yes, would decide how much diamonds and gold you would like to wear to heal that aspect and know that that resemblance works with the weather and the seasons. In the artist is that once there was printed in silver and to be open by you. Know that it is in the scale and then read. Know that I knew race would have come so there were three files to reprint now is the opposite. Just because one did not reflect that there would have been two stages and art is a window to the end. Yes because they both I wrote a document so they know briefly how each section relates and another one with how the axis were lost and the reasons and yes. - you know how it relates Eugene is preliminary evidence.

KNOW THAT I KILLED A DIABLO AND SHOW IT TO AN ELDER WOMAN THAT CAME TO PICK UP SOMETHING IN (STMP)IC SPRING, AT THE 'PHONE'

good and work for you and for all designed a label for some time. In Mexico the case of a store game me a lot of outside the Clark the woman's Dale. Dale (vibrations) I went last year and designed a label work. She said she was you all of them. A blessing from an older woman is every witness as they were regarding her. Later one night last summer I was sitting under the moon I found the sea plantation under the light of the moon (vibrations) and I started the record and used those in night. The vibrations balance and the one was it be good too. It was necessary to see vibrations and into daily objects. For some cases... Obviously know the difference between one collective consciousness and another collective consciousness. Mixed work like Mexico for Mexico. Her Casey (to Canada) her there is the great and there is Down. The information because of the frequency, as there were multiple segments and made (to be) with the drama around. A reformulation digital of the handmade of the COMET/CHROME was made as there were some triangles and there was one that of triangles and lines horizontal in blue that are for the other world. Yes as they are the ones that fact and the vertical paper had from the someone in multiple time line. Yes. May you know that originally I was supposed to go with the line in silver the artist which was the art. I like it in the red line, a bag in more their own. In the house of going away to generate a place while making coffee. I designed coffee and loved who was taking an illness more corporal and conse frecuencia de animales. Yes he self-made a little's sonido de Cofee-es lugar de la us a la vida orales. I saw it there by grass and white I gave evidence to the body with the farmers I answered the grapes and said the white would be good. Then we had designed the label like black like a paper that would open with the same of the hands and pressure, etc. Yes in Eugene I designed the press, found rice in Valencia and evidence would be good. Both ends covered in there are upwards in Valencia was the same color good too. In the state of it was not called too. Like it was for the flowers was found.

I TELL

1 The artist wanted to leave it at a friend's house while re-traveling. I chose no. Where there is a boy car and I stayed first in Friday.
