

## CERTIFICADO DE PENITENCIARIAS

Cuando estaba en NY vivía en un apartamento en el que no había regulación de temperaturas y así a menos 20 grados centígrados andaba en carzoncillos con la ventana un poco abierta para que circulara la temperatura además jilipollas por temperatura suele haber una resistencia que impide que el AC pierda energía y sea más eficiente facilitando la descondensación y así el aire se regenera también por la puerta o ventana abierta. Como fueron unos años después al mudarme a un lugar en el campo de pueblo o ciudad pequeña decidí vestir menos y así se el cuerpo ajusto. Luego mangas cortas tal un corto calentamiento. Siempre tal y como en otros sitios la copa de café y los buenos ferrendinos. Después de trabajar y ejercitar al mismo tiempo para que sepais jilipollas ignorantes cara de monkeys aware of it took about 4 months of preparation and about 4 months to take about 12 pictures in nature then the fathers ask so there was another set of pictures that replaced the original no the wisdom within objects or pon pon with the energy yof one am in lov you said the kidns said take care of 16 children whitin all of t hem and experience pregnancies along with the jobs and moneys because the money would be dran by the dead and the living no eating alow becuae eating well also eating withot emotion nno emojis or emoticons alow .

Dear there are the eyes of a dear whe nthey learn then whe nthey saw the eyes of and hte head of the dear on the wall that was the lesson for a hunter. You took the lesson of a hunter you are the hunted.

Therefore I you know we would go somewehre there when it is and no as a healigh ceremony but fo the pleasure that with a knife the coyote jaw says we will because we will feed and with a small fire there woudl b e raw blood and meat along with fleshly cook slide of meat rather than the coyotes that are the kind once i nthe real of animals.
