guerra de negacion de como por ejemplo los EEUU se convirtieron en lo que se convirtieron y lo que en realidad pensaron que dijeron que ganaron uno diria que como mejor dejar a los EEUU pensar que ganaron.

1 - I noticed about 8 years ago in Brooklyn that they were slicing people to make robots in a way that they would not notice or feel. They got it wrong. The emotions and the right human fire would return.

2 - When I was cutting the shading branches of trees in the backyard or front yard according to the English concept that conquered the land, or the French press, or the hamburger or burgers, or the potatoes from Spain from the times of Boikot so they can put wherever to Spain, or the Russian letters with oils from Italy and berries from France. Or the land of the side of the Cherokees or who knows the casta.

3 - I said the models would be robots as there are acedurias of the Pleyades rather than passionate lives. Was not a model that switched the jewels for castas from India?

4- Between two unconscious backyards and waters. Like when it rained at the backyard it was feeding the pond. So therefore at some level if there was water in the winter time I was allowed like she was allowed to walk up the Condo Association. Between the two lands they said that and there is a space so they said that is to be claimed energetically but so you know like the coyotes are coyotes that path was a path for dears to walk their paths. Now it is land for those two lands.
