Catalogue 2025

COSAPOTS

EVERYTHING A GALLERY

Inspiration is everywhere. On every corner. In every street. Shapes. Materials. Patterns. Our architects use this inspiration to design our unique Cosapots collection. Handcrafted excellence in large size planters. Designed for impact, build to last.

Designed for impact

Cosapots is a high end brand in flowerpots and planters where perfection and care are keywords. All Cosapots are designed by architects and constructed by highly skilled craftsmen. Every piece takes about 3 to 7 days to finish and are 100% handmade.

The design explained

Visual effect

Thanks to the inward rim, there is given an extra dimension to the appearance of the plant or tree.

Structural solidity

The high inward rim makes the pot very strong.

Strong, frost resistant and impermeable

Thanks to the Cohesa material (Cohesa is made of the best quality polyester, fiber glass and natural additives).

Raised bottom

So excess water can flow away underneath the pot.

Easy to repot

Thanks to unique thin rim.

Natural look

Handmade and easy to move thanks to the lightweight Cohesa material.

Waterproof

Holes for drainage to be drilled by end user.

Unique strength

Built to last, built like a yacht. Cosapots are made from the best polyesters combined with high quality fibreglass, exactly how boats are made, strong.

Unique strength

Extra high inwards rim for strength.

Reinforcements to give extra strength to the body.

Reinforcements to avoid waving of the body.

Up to 7 layers of resin and fibreglass depending on the size of the pot.

Unique texture

Every pot is handmade by highskilled craftsmen and is a unique piece of art. The natural stone look is achieved by mixing carefully selected high quality materials and natural colourants.

The look from close: by polished finish.

The look from far: by natural colourants.

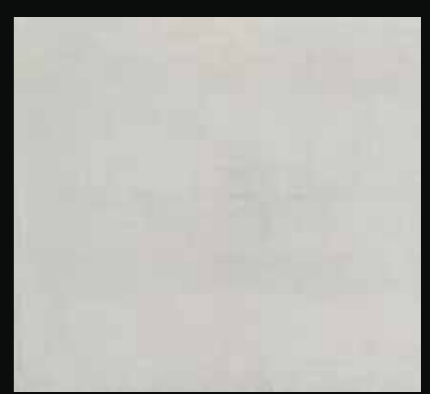

Timeless colours

THE COLLECTION 2025

Mondo

Gentle but impressive rounding's, give Mondo a static and elegant character. Mondo has been designed to impress with bear class. Size matters, choose Mondo to stand alone or combine different sizes to create a Mondo family into a unique project.

Mondo Taupe stone

Roco

Low and wide, round and bold, remaining very elegant and gentle. Roco is one of our Supermodels. An evergreen design, timeless and vibrant. Signature curves have been well balanced with its proportions. The Roco family comes in different colors and sizes form large to huge, to marry with any high end architectural style.

Roco Grey stone

Juno

For Roman mythology, Juno was the Queen of Gods! Powerful yet elegant. A well-respected creature. Juno shares its rim design with the complete Cosapots as a signature of strongness and purity. The family represents our archetype shapes of rich simplicity. Our designs are very strong, stable and elaborated to fit with the world's most beautiful in- and outdoor plants.

Lupo

Our solitary Lupo, or wolf, stands for independence and strength. A solid and static design, but leveraged by its slim footprint to decorate aisles, terrasses and venues with style. Trees, ornamental plants, and beautiful flowers will turn Lupo projects into high standards and eclectic vibes.

Orbo

Bringing strong and simple aesthetics is an Orbo achievement. Very familiar as a shape, it dominates in a playful way while remaining subtle. While one ORBO will make the difference, many ORBO's will never be too exaggerated. We bring them into well balances sizes and proportions.

Orbo Taupe stone

Reglo

Reglo is a reference to the adjective 'regular' which is used to describe something that happens in a specific way again and again. It's a hint to the regular shape of a rectangular planter. Be careful though, the Reglo is not just an average rectangular planter. The thought-out use of height and width proportions make the Reglo a good fit in the Cosapots family. With its simple but timeless design it gives a feeling of seriousness without giving up the feeling of luxe. A basic shape that lends itself ideally to combinations

Reglito

Reglito is the square brother of the Reglo. It's a basic shape that lends itself ideally to combinations but it can perfectly fill a space by itself. The brothers, Reglo and Reglito offer tons of stunning combinations together. A combination of these 2 is guaranteed a well-dressed and captivating room.

Lonno

Behold the longest planter in the Cosapots collection! A true mastodon, introducing Lonno. Lonno is a rectangular planter from another level; with a length of 2 or 3 meters you can transform a whole room with just 2 of them. While having big dimensions they still have the signature timeless design of the Cosapots identity.
