

# COSAPOTS

EVERYTHING A GALLERY

Catalogue 2026

# Designed for impact

Inspiration is everywhere. On every corner. In every street. Shapes. Materials. Patterns. Our architects use this inspiration to design our unique collection.

Cosapots are strong, lightweight and available in exceptionally large sizes, perfect for both indoor and outdoor spaces.

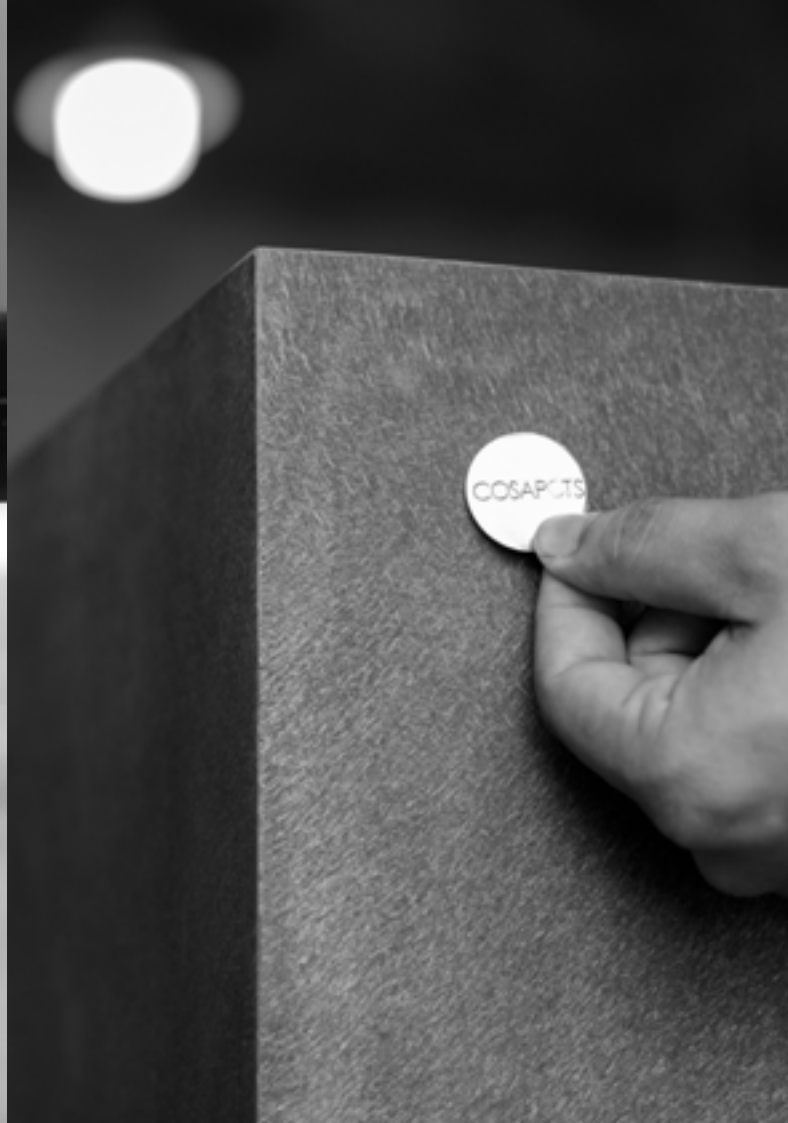

**COSAPOTS**  
DESIGNED FOR IMPACT

## Built to last!

All Cosapots are constructed by highly skilled craftsmen. Made from the best polyesters combined with high quality fibreglass. Every piece takes about 3 to 7 days to finish and is 100% handmade.

## The Design explained

### Premium appearance

The high, solid inner rim conceals the interior framework, allowing it to remain visible and contribute to a high-end appearance.

### Structural reinforcement

Every Cosapots has built-in structural reinforcements to improve durability, ensuring superior strength even in demanding environments.

### Forst resistant & impermeable

Made from Cohesa, the best quality fibreglass combined with polyester and natural additives.

### Hand-finished texture

The lightweight material allows for easy mobility but has the look of heavy stone.

### Waterproof

Completely sealed with a watertight layer on the inside of the pot. Holes are to be drilled in the bottom for outdoor use, allowing for proper drainage.

### Easy to re-pot

The unique, thin rim maximizes space and indicates the maximum filling height, while also lowering the center of gravity to enhance stability.

# Unique strength

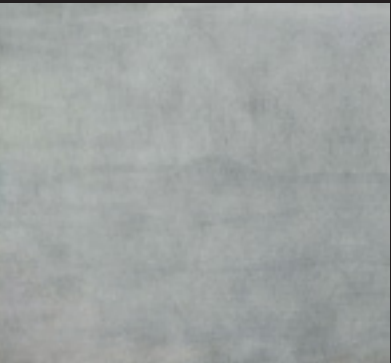

Up to 7 layers of resin and fibreglass, a solid inward rim and additional reinforcements give the planter superior strength.

# Timeless colours

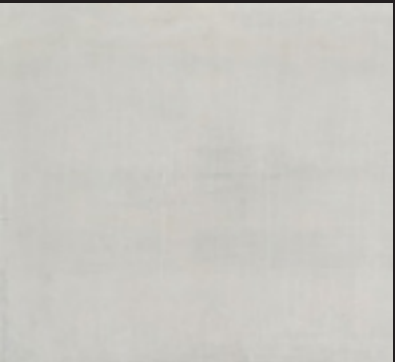

The natural stone-like look is achieved by mixing carefully selected high quality materials with natural colourants.

Brown stone

Concrete stone

Sand stone

River stone

Taupe stone

Remarkable  
texture

The look from close: by polished finish.

The look from far: by natural colourants.

# How to plant?

1. When used outdoors, drill holes every 30 cm of planter space in the bottom of the pot to allow for sufficient drainage. Use a 25 mm drill bit. The excess water can flow away along the raised bottom.
2. Add a layer of porous substrate of minimum 10% of the pot's height. Let a plant expert assist you in optimal watering management according to your planter's size and plant's specific needs.
3. Select the right potting soil for your plant and fill the pot. The bottom of the inner rim indicates the maximum filling height for an aesthetic result.
4. Cover the soil with bark chippings or similar decorative toppings to prevent weeds from spreading and wet soil from splashing up.

# Cleaning & maintenance

Cosapots offers a cleaning kit that removes even the most persistent stains. Spray the product on the surface to be treated, let it soak for 2–5 minutes, then remove stains or dirt with a sponge or soft scrubbing brush. Rinse with water afterwards.

THE COLLECTION 2026

New

# Amo

The Amo shows how simple geometry can be truly beautiful. Its gently tapered silhouette feels both elegant and timeless. The collection includes distinct shapes that look great on their own, but even better together. Whether paired as a duo, arranged in a trio, or composed as a quartet, they naturally complement each other and create a sense of rhythm and balance. Discover how the Amo brings harmony and beauty to any space.

# Juno

For Roman mythology, Juno was the Queen of Gods! Powerful yet elegant. A well-respected creature. Juno shares its rim design with the complete Cosapots as a signature of strongness and purity. The family represents our archetype shapes of rich simplicity. Our designs are very strong, stable and elaborated to fit with the world's most beautiful in- and outdoor plants.

# Lupo

Our solitary Lupo, or wolf, stands for independence and strength. A solid and static design, but leveraged by its slim footprint to decorate aisles, terrasses and venues with style. Trees, ornamental plants, and beautiful flowers will turn Lupo projects into high standards and eclectic vibes.

Lupe River stone

# Reglo

Reglo is a reference to the adjective 'regular' which is used to describe something that happens in a specific way again and again. It's a hint to the regular shape of a rectangular planter. Be careful though, the Reglo is not just an average rectangular planter. The thought-out use of height and width proportions make the Reglo a good fit in the Cosapots family. With its simple but timeless design it gives a feeling of seriousness without giving up the feeling of luxe. A basic shape that lends itself ideally to combinations

# Reglito

Reglito is the square brother of the Reglo. It's a basic shape that lends itself ideally to combinations but it can perfectly fill a space by itself. The brothers, Reglo and Reglito offer tons of stunning combinations together. A combination of these 2 is guaranteed a well-dressed an captivating room.

☒ Cosapots core collection

# Lonno

Behold the longest planter in the Cosapots collection! A true mastodon, introducing Lonno. Lonno is a rectangular planter from another level; with a length of 2 or 3 meters you can transform a whole room with just 2 of them. While having big dimensions they still have the signature timeless design of the Cosapots identity.

# Tailor made projects

The Cosapots team designs custom made projects. Models, sizes and colors can be made on demand.

# 3D files available

Our library of 3D files offers ready-to-use models for integration into landscape and architectural plans.

COSAPOTS  
DESIGNED FOR IMPACT

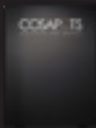

POS

# Frame Banner

Cosapots focuses on presenting medium to large-scale models in design shops and boutique shops, where impact and craftsmanship can truly stand out. A standing banner enhances brand visibility and attracts customer attention within the retail space. To maximize the customer experience, we recommend additional guidance from the store manager to highlight key features and benefits of the brand.

Size cm

160 x H 210

COSA.POS.FR160

# Sample Box

Sales for specific clients require requested colour schemes for moodboards and colour matching. This personalized approach ensures that the products align seamlessly with the client's interior design or architectural vision. This allows clients to preview combinations and make informed choices before purchase. This showcases our flexibility and commitment to delivering tailored solutions.
