Preface

This is already the fifth Estonian speed skating yearbook. When I made the first edition it was only for myself to collect all info about the Estonian speed skating season. But more people were interested and appreciated this collection of results and rankings.

The season started with the presentation of a sponsor. The Dutch company Sportsnavigator adopted Estonian speed skating and sponsored four girls and four boys for two years. They all received a new racing suit. This gave a positive drive to the skaters. It possibly helped for there were no less than 37 new national records this season.

The track in Adavere was, again, improved. The surface is now covered with a layer of asphalt. This makes it easier to make good ice for fast times. Big improvement was made on the ice resurfacing machine too. The ice in Adavere is said to be faster than ever before. Unfortunately there were no skating competitions during most of January due to lack of volunteers. The ice master Treiman was elsewhere in Europe with his skating team and other volunteers were busy with the organisation of the European Figure skating Championships and/or the marathon series.

Just like last year there was also a competition on Türi Järvel, Järvamaa. Hopefully they will continue doing so, next year. The tracksize is 1200 meter, single lane. So it seems possible to make a 400 meter track that meets the international standards.

For the second year the International Skating Union organized a Junior World Cup series. Saskia Alusalu and Mart Markus were participants and they scored a lot of national records. Mart Markus also participated in the Junior World championships.

New this season was the series of four marathon skating races. There were hundreds of participants each competition. Unfortunately the last race had to be cancelled. But the series was a success and will hopefully be continued next year.
