Content summary and list of documents for fencing in Piusa project site

Summary

Building note is an official document approved by local government (in case of Piusa by Võru Municipality) through EHR - National Building Register (www.ehr.ee). Approvement of it does show that all needed documents are there, coordination with needed stakeholders is done and building can be done during next three years. In case of Piusa, building note did contain all data on fence measures, coordinates of fencing site locations, information about landowners and had attached construction drawing (sketch) of the fence; terms of reference from RMK (who is practical manager of nature conservation in Piusa), including scheme of fence locations; coordination letter from KEA (who is responsible manager of nature conservation in Piusa). As fences in Piusa were all planned only on state land, there was no need for coordination with private landowners.

Building note for fencing in Piusa contains data about applicant – ELF and its contact person, project manager Lauri Klein; main documents attached (construction drawing by OÜ Suurmeister, fence location schemes by ELF and building description by builder OÜ Aiacentrum); technical details of the building heights (absolute 3 m and actual 1,73 m) and length (1050 m) and basement of the building; list of land parcels concerned and coordinates of turning points of the fence.
