

Military Products Guide

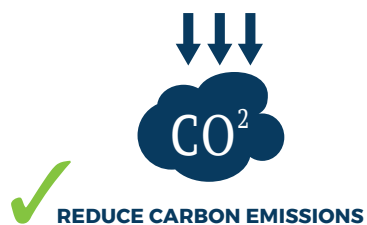

SMART | TRUSTED | BEST-IN-CLASS

Lighter. Better. Safer.

Lightweight logistic solutions for the modern warfighter

With decades of battle-proven performance, Scepter products offer excellent mechanical strength and superior impact resistance. Visit scepter.com to discover why defense forces around the world trust Scepter to serve alongside them. **UN CERTIFIED.**

LIGHT WEIGHT PACKAGING FOR FUEL, WATER AND AMMUNITION

Lighten the load and save costs throughout the Defence budget with strong, lightweight, and soldier-friendly advanced packaging solutions for fuel, water and ammunition.

Scepter containers are 14% - 41% lighter than traditional wood and steel packaging. Lighter weight equipment eases the load of the already over-burdened warfighter, and provides opportunities to save costs on healthcare, vehicle maintenance, and fuel, while helping reduce carbon emissions and allowing logistics planners to maximize the payload of aircraft and other vehicles. Plastic is both lighter and safer, and with fewer dunnage components, there is less ammunition handling and minimum battle-field debris, improving safety outcomes in the theatre and in the ammunition plant.

FOR DEPARTMENT OF DEFENCE

- **Lighter load for soldiers**
- **Decreased healthcare costs associated with musculoskeletal injuries**
- **Healthier soldiers improves force readiness**
- **Reduced vehicle maintenance**
- **Decreased fuel spend**
- **Maximize vehicle payload**
- **Less battle-field debris**
- **Ammunition is accessible from skid face – faster easier access and more efficient inspection**
- **Less noise when handled in a tactical situation**

FOR OEM

- **User-preferred packaging**
- **Safer, more efficient manufacturing.**
- **Fewer packaging components means faster assembly line and less ammunition handling**
- **Improved efficiency drives labor cost savings**
- **Better solution is a differentiator to help win business**

MILITARY FUEL AND WATER CANS

Standard issue to the U.S. and Canadian Armed Forces, Scepter's military fuel and water cans have served alongside NATO allied forces on more than 40 platforms for the past thirty years. Made from rugged high-density polyethylene (HDPE), Scepter military cans are virtually indestructible! **UN CERTIFIED.**

LIGHTER

- 4 lbs lighter than traditional metal cans
- Reduced soldier fatigue
- Decreased fuel spend
- Less wear and tear on vehicles
- Lower carbon emissions

41% LIGHTER THAN METAL CAN

BETTER

- Empties 5 gallons in under 40 seconds
- Easier to open and close
- Waterproof
- Corrosion and fungus resistant
- Withstands extreme weather conditions
- Standard issue to US and Canadian Armed Forces

SAFER

- Self-extinguishing UL-94 flame rating
- Safer under pressure than metal cans
- Less noise when handled in tactical situation

Lighter. Better. Safer.

MILITARY AMMUNITION CONTAINERS

Body armor, tactical gear, communications equipment and their accessories have increased the individual weight burden of today's soldier to well over 100 lbs. At 17% - 35% lighter than wood and steel containers, Scepter's ammunition containers require less physical exertion from the warfighter while providing numerous additional benefits in alignment with modernization cost savings and green defence priorities.

EASY ACCESS TO AMMUNITION

- Ammunition is accessible from skid face. Pallet load can remain intact eliminating the need to fully un-strap or disassemble
- Allows for ease of inspection
- Faster access to ammunition

SAFETY AND PROTECTION

- Reduced noise level in tactical situations
- Dunnage components built into interior – reduced battlefield debris
- Minimal dunnage means less ammunition handling for OEM

COST EFFECTIVE

- Recoverable and reusable
- Excellent long-term storage
- Corrosion and fungus resistant
- Strength and durability results in reduced loss associated with rough handling
- Drives labor costs savings for OEMs vs. traditional packaging

81 mm Mortar Container

35% LIGHTER THAN PA156 STEEL CONTAINER

WEIGHT SAVINGS = 408 LBS. PER PALLET

WEIGHT SAVINGS = 6,477 LBS. PER 1000 ROUNDS

Lighter. Better. Safer.

Myers Industries is a leading manufacturer of polymer products for industrial, agricultural, automotive, defense, commercial and consumer markets.

Blow Moulding ● Injection Moulding ● Rotational Moulding ● Thermoforming

MYERS INDUSTRIES BRANDS

Buckhorn
Designing plastic reusable containers, pallets, and bins as a solution to improve material handling productivity—no matter the industry or challenge.

Trilogy Plastics
Designer and manufacturer of a large variety of rotationally molded products serving a broad range of customers and markets..

Akro-Mils
Manufacturer of storage, organization, and transport solutions designed to improve productivity and inventory control.

Scepter
A producer of portable fuel cans and water containers, portable marine fuel tanks, ammunition containers, and custom molded products serving multiple markets.

Jamco Products
Designer and manufacturer of heavy-duty steel carts and safety cabinets used across multiple markets.

Myers Tire Supply
The largest U.S. distributor of tools, supplies and equipment for the tire, wheel and under-vehicle industry.

Ameri-Kart
An industry-leading rotational molder and thermoformer that manufactures a broad range of custom plastic parts within the RV, marine, and custom industries.

Patch Rubber Products
The producer of a broad line of passenger car, truck, and off-road tire repair and retread products..

Elkhart Plastics
Designer and manufacturer of rotationally molded products in a variety of shapes, lengths, and thicknesses, serving a broad range of industries.

Tuffy
A warehouse distributor of tire repair equipment and supplies, including automotive service related tools and accessories to tire dealers, retreaders and trucking fleets
