

As part of the [ERDERA Clinical Trial Call](#), a **Preparation Study Service (PSS)** has been established to support applicants shortlisted for Stage 2 of the call. The PSS aims to support strengthening the quality and feasibility of future clinical trial proposals by providing tailored expert advice before full proposal submission.

To support this service, ERDERA is launching a **Call for Experts** for two pillars of the PSS:

- **Pillar 1: Regulatory Science**, coordinated by EATRIS, supporting applicants in the preparation of EMA Scientific Advice Briefing Packages and regulatory strategies.
- **Pillar 2: Clinical Trial Methodology**, coordinated by connect4children (c4c-S), supporting applicants on study design, biostatistics, pharmacometrics, epidemiology, and other methodological aspects of rare disease clinical trials.

We are seeking experts with relevant experience who may be willing to contribute to the PSS between January and July 2027. To identify potential experts across the ERDERA community and our networks, we invite you to complete the short survey below and share it with colleagues who may be interested.

Survey: [ERDERA Clinical Trial Call 2026 : Call for Experts – Fill out form](#)

You will find more info the call and the PSS in the [Call Text](#).
